

The health and well-being of our customers, employees, retail partners, and the communities we serve is always a top priority. As such, we have implemented a number of protective measures to keep our employees, retail partners, and community healthy.

We are closely monitoring updates from the Centers for Disease Control and Prevention (CDC), and will follow guidelines put into place by the CDC as well as other local health and governmental agencies. We ask that the public exercise good judgment when visiting the property; including following CDC guidelines for social distancing and hygiene practices. We also ask that anyone with a fever or experiencing other symptoms, to stay home.

We are taking the following measures* in our shopping center:

1. Following all applicable guidelines set forth by local officials and/or health departments.
2. Encouraging everyone on property to follow social distancing guidelines.
3. Prohibiting groups of more than 10 people congregating in the mall common area.
4. Cancelling or postponing all mall events until further notice.
5. Limiting the amount of available seating to comply with social distancing guidelines.
6. **Closing the following public gathering areas:**
 - o Children's play area
 - o Soft seating areas and common area gathering spaces
 - o Drinking fountains
7. Requiring mall management staff to wear masks while in common areas, public spaces or when other individuals are present.
8. Requiring all vendors and contractors to wear masks in the common areas, public spaces or when other people are present.
9. Encouraging our retailers to provide their employees with masks and that employees wear masks while interacting with others, when in the mall common area or public spaces.
10. Placing hand sanitizer units throughout the property.
11. Conducting temperature checks on all mall management, security and janitorial staff upon the start of each shift. Requiring that anyone with a fever of 100.4 F or higher and/or anyone experiencing other symptoms return home and contact their healthcare provider.
12. Increasing the frequency of cleaning and sanitizing all high-traffic common areas with an enhanced focus on all touch points with CDC-recommended cleaning agents.
13. Requiring each store and restaurant to follow applicable guidelines set forth by relevant government orders; which could include but is not limited to: occupancy restrictions, social distancing markers in checkout lines, cleaning and sanitizing procedures, and the closure of fitting rooms.

*Please note: additional measures may be put into place and/or measures may be adjusted based on updated recommendations from the CDC, the local health department or other governmental agencies. Find the most up-to-date information from the Centers for Disease Control's website [here](#).
