

The Bouquet Speculum Use List

Any situation you would use a two blade speculum, The Bouquet Speculum can be utilized. This list highlights a wide range of uses, though not all encompassing.

Cervical Cancer/Precancer Screening and Diagnosis

- **Pap Test:** Screening for cervical cancer/precancers.
- **HPV Probe Screening:** DNA identification of HPV and cervical cancers/precancers.
- **VIA (Visual Inspection with Acetic Acid):** Screening for cervical cancer/precancers, especially in low-resource countries.
- **Colposcopy Assistance:** Increased accuracy in screening for cervical cancer/precancers.
- **Vaginal Wall Screening:** Identifying vaginal precancers/cancers.
- **Surgical Excision or Biopsies Assistance:** For precise diagnosis and treatment of surgical lesions.
- **Endometrial Sampling Assistance:** Facilitating minimally invasive collection of endometrial tissue for diagnosing conditions like endometrial hyperplasia or cancer.

Therapeutic Procedures for Cervical Dysplasia and Cancers

- **Cryotherapy Assistance:** Treating cervical dysplasia (precancers).
- **Thermoablation Assistance:** Treating cervical dysplasia.
- **LEEP (Loop Electrical Excision Procedures) Assistance:** Treating cervical cancer/precancers.
- **Microwave Ablation Procedures Assistance:** Novel, FDA-cleared treatment for vaginal and cervical cancers/precancers.
- **Laser Therapy Assistance:** For treating vaginal atrophy, scars, or lesions with precision.

Pelvic and Obstetric Care

- **Obstetric Screening:** Facilitating cervical dilation examinations during pregnancy.
- **Evaluation of Cystocoeles/Rectocoeles:** Assessing pelvic floor disorders.
- **Cervical Cerclage Assistance:** Stitching up the cervix to prevent pre-term labor.
- **D&C (Dilation and Curettage) Assistance:** For miscarriage management.
- **Post-Partum Hemorrhage and Balloon Tamponade Assistance:** Providing life-saving care during childbirth.
- **Postpartum Vaginal Healing Assessment:** Evaluating recovery and identifying tears or complications in vaginal tissues postpartum.
- **Cervical Ripening Balloon Placement:** Facilitating placement for the induction of labor.

The Bouquet Speculum Use List

Any situation you would use a two blade speculum, The Bouquet Speculum can be utilized. This list highlights a wide range of uses, though not all encompassing.

Gynecological Procedures

- **Polypectomy Assistance:** Removal of cervical polyps.
- **Hysteroscopy Assistance:** Evaluation of the uterus with a small scope.
- **IUD (Intrauterine Device) Insertion and Removal Assistance:** Supporting contraception needs.

Advanced Diagnostics

- **Early Detection of Vaginal Atrophy or Lichen Sclerosus:** Enhancing diagnostic accuracy for conditions associated with menopause or autoimmune disorders.
- **Enhanced Imaging Compatibility:** Integration with ultrasound or optical coherence tomography (OCT) for real-time imaging of the cervix and vagina.

Pelvic Floor and Surgical Applications

- **Adjunct for Pelvic Organ Prolapse Pessary Placement:** Supporting accurate and comfortable fitting of pessaries.
- **Intraoperative Assistance During Laparoscopic Surgeries:** Acting as a stabilizing platform or exposure tool during surgeries requiring vaginal access.
- **Uterine Manipulation Support:** Assisting with stabilization and positioning during minimally invasive gynecologic surgeries.

Sexual Health and STI Screenings

- **STI Screening:** Ensuring comprehensive screening for sexually transmitted infections.

Fertility Care

- **Assistance in Fertility Monitoring:** Helping with cervical mucus assessment or advanced intrauterine insemination procedures.

Forensic Applications

- **Forensic Rape Kits Assistance:** Obtaining accurate DNA samples for legal proceedings.
