Site Location/Description:

**Instructions:** The Competent Person (CP) shall complete this Rescue Plan whenever a Site Plan assigns use of a Personal Fall Arrest System. The scope of this plan is limited to this jobsite only, & shall remain posted at the jobsite at all times. All Plan participants must have appropriate Authorized Person training, in accordance with OSHA Fall Protection Regulations. When completing this plan, consider that a suspended worker may be unconscious or otherwise unable to assist in rescuing themselves.

Contacts: Specify at least one contact method for the CP and Rescue Agency in the table below.							
Contact Type	PA / Intercom	Verbal / Face-to-Face	Radio Channel (Specify #)	Phone (Specify #)	Other (Specify)		
Competent Person:							
Rescue Agency:							

**Equipment:** Complete the table below to identify available rescue equipment. Document its location and specifications (e.g. height of aerial lift, length of rescue rope, weight rating of tripod, etc.).

Type	#	Location(s) & Specs	Type	#	Location(s) & Specs
		RESCUE	EQUIPMENT:		
Aerial Lift			Rescue Pole		
Ladder			Rescue Rope		
Mobile Scaffold			Tripod & Winch		
Block & Tackle			Life Ring		
Controlled Descent Device			Other (Specify)		
		MEDICAL E	QUIPMENT:		
First Aid Kit			Stokes Litter		
AED			Other (Specify)		

Anchorages: If this Plan requires additional anchorages for the suspended worker or the rescuer, document their location and type. A Qualified Person (QP) or CP must sign off on any anchor as appropriate for its type. Anchoring to a PFAS in rescue requires completion and attachment of the supplemental Clearance Calculation form.
