

**WHO'S
CALLING?**

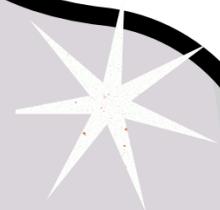

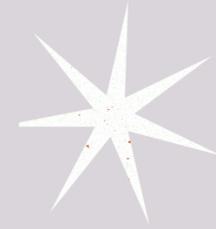

A NOTE TO OUR PATIENTS:

It has come to our attention that some patients may be missing important phone calls from our office, specialists' offices, and other healthcare organizations—including hospital calls to schedule tests—due to their phone settings.

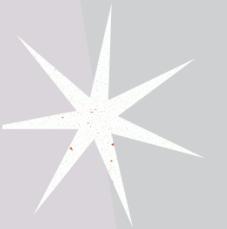

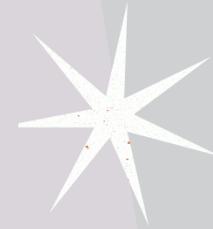

A NOTE TO OUR PATIENTS:

We kindly ask that you ensure there is a reliable way for medical offices and healthcare providers to contact you. Receiving these calls is an important part of coordinating your care in a timely and effective manner.

A NOTE TO OUR PATIENTS:

Recently, we have experienced a significant increase in administrative work related to reconnecting with patients who may have missed these calls. This can lead to delays in care and impacts our ability to serve all patients efficiently.

A NOTE TO OUR PATIENTS:

We understand that unwanted or spam calls can be frustrating. We encourage you to explore phone settings or tools that help manage these calls without blocking or filtering important healthcare-related communications.

**THANK YOU FOR
YOUR ATTENTION TO
THIS MATTER AND
FOR HELPING US
PROVIDE YOU WITH
THE BEST POSSIBLE
CARE.**
