

CMG Masking Update

Clarksburg Medical Group will continue to require anyone entering our office to wear a mask after the Ontario masking mandate lifts June 11, 2022.

We encourage our patients to consider the many vulnerable patients that enter our office each and every day which include but are not limited to:

Those who are receiving chemotherapy and radiation treatments

Those who are pregnant

Those who are too young to vaccinate

Patients exhibiting any cold or flu-like symptoms are required to wear a mask. We thank you for your cooperation.
