

These letters can be mounted in many different fashions. Flush or Raise mounted. For flush mount the studs go entirely into the wall and raise mounted can be left floating with partially inserting the studs in the wall (up to 1 off the wall). Spacers are available for most orders for an additional cost. Templates are also available for most designs for an additional cost please ask for a quote.

**STEP 1:** Hold the design up to desired position and mark where to drill your holes.

**STEP 2:** Drill holes where marked.

**STUD SIZES:**  
2" STUDS - 1/4-20

**STEP 3:** Place a heavy duty adhesive (100% silicon) on the threaded studs\* and place in holes on wall. Apply painters tape to hold letters in place until adhesive has dried.

\*If you want the letters to stick off the wall a certain distance you will not want to put adhesive on the entire threaded stud but just the portion that will be in the wall.

\*\*If you have access to the back of the studs, nuts with the matching thread pattern can also be used to mount these floating letters.
