April 25, 2014

Jim,

I wanted to drop you a note and say "Thank You" once again for the outstanding job your company did with our recent remodeling project here at the dealership.

When General Motors required us to take a nearly new building and "update" the interior and exterior finishes to better align with the color scheme of their new "Facility Image" program, it was going to be a sizeable project. All of the interior millwork, doors, and the framework for dozens of office cubicles had to be changed from the original dark cherry color scheme to a clear maple color scheme in all "public areas" of our building.

Faced with outlandish replacement costs we began searching for ways to possibly re-laminate those surfaces. Needless to say, we are very glad we found your company and the Belbien product. After meeting with you, seeing the product, learning about the installation process, and hearing about its durability, we felt confident that it would more than meet our needs.

The installation process was less disruptive and far quicker than replacing all the existing items would have been. The finished cost was about half of what we would have paid had we gone the other route, and the installed product looks even better than we expected. Our decision to use your product and your company was absolutely the best choice we could have made.

If you have other prospective customers who are considering similar projects, we would be glad to answer any questions they might have. In fact, I would highly recommend that they not hesitate to use both your company and your product.

Thanks again for the excellent job,

Bo Chambers
