

# WEEKLY POOL SERVICE AGREEMENT

## *Original Works of Water™*

Proper pool cleaning and maintenance is the best way to keep your pool as inviting as it was when it was first built. Pool cleaning is something you can choose to do on your own. However, there are many advantages to having a pool -pro do it for you. We're sure you have enough home projects to take care of--Relax and let Tully Pools do the work for you!

Just as you take your car to a mechanic to keep it in good condition, you also need to have an expert examine your pool and perform ongoing maintenance to keep it in optimal condition.

A professional pool cleaning specialist helps to protect your investment and the health of all who swim in your pool. Our highly trained technicians will maintain your pool regularly and ensure that your pool water is maintained and balanced. On every visit, we will perform water testing to verify the levels of each chemical in your pool. Once we have a clear diagnosis of the quality of your pool water, we can give the right prescription to ensure the health and quality of your pool. Without this balance, your hair and skin can be damaged, swimwear can become bleached and faded, algae and bacteria can infest your pool, and pool walls can erode or can begin to develop scales. In addition, the equipment that you use will have a much shorter life-span and this can cost you thousands of dollars!

Tully Pools ensures that you receive a premium pool service to maintain and balance your pool water and its equipment so that your pool remains clean, clear and safe and can be enjoyed at all times with complete peace of mind.

This agreement is on a month to month basis and can be canceled with 30-days written notice.

### **At each service interval we will perform the following:**

1. Check and balance your pool water's chemistry
2. Clean and empty your skimmer basket, pump strainer basket, and pool vacuum bag if so equipped
3. Thoroughly brush and pool walls and tile line
4. Spot hand vacuum any needed areas
5. Overall inspection of your pool's equipment. If we find any essential items that are faulty that will immediately affect your pool's operation such as baskets, vacuum bags, or pressure gauges we will replace them. You will be invoiced for any required parts on your next statement. **Please note that if we find any other items through our inspection that need attention that are not critical, we will leave you a note with our recommended steps. If you would like us to perform the service, please call us at (404) 307-6143 or email to [hugh@tullypools.com](mailto:hugh@tullypools.com) to schedule an appointment**

**Payment for services rendered are due upon receipt.** For your convenience, payment can be made online via your QuickBooks invoice. *Any invoice past 15-days will be subject to an additional service fee.*
