

# Just because school's out, learning doesn't have to stop.

## THEME LESSON DESCRIPTIONS

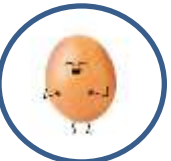

### What Floats Your Boat?

Campers will become captains and shipbuilders by using recycled materials to engineer their boats. We'll tap into the different properties of water through engaging science experiments.

### Shooting Stars!

We're kicking off the summer with some fancy footwork while playing games like soccer, obstacle courses, tag and dribbling relays

### Egg-citing Challenge

Egg-ger needs to save his friend from being scrambled! In order to do so, he must catapult safely over a 12-ft wall. Campers will build a safe lander for Egg-ger.

### Creative Movement

Campers will dance to the beat of their heart with Ms. Jane Vonburger from the Ballet and Movement Arts studio here in Moore!

### Happy Art

Our campers will let their creativity flow as they design and learn through literacy. Get ready to paint, sculpt, and design tessellations this week!

### Jr Explorations

Our Campers will venture the grounds exploring nature through nature art, bug cycle activities, and more!

### What Moves You?

Our campers will immerse themselves in a lesson of kinetic, moving art. By the end of the lesson, students will have the opportunity to use kinetic art to design something beautiful and functional!

### Fizzy Fun!

Water rockets, explosions and gooey slime will highlight this lesson. Campers will conduct fun, messy experiments that will peak their ingenuity and innovation skills.

### Escape Mystery Island

It's up to the campers to solve clues, complete scavenger hunts in order to escape the Mystery Island all while exploring exciting science experiments.

### What a Catch!

Campers will keep their eyes on the ball by working on making great grabs and throws as they learn the fundamentals of playing catch through games and drills.

### Lights, Cameras, ACTION!!!

Our campers will collaborate with fellow students to make their own music video, short film or commercial crafting their own script, set and costumes.

### Core Characteristics

Small acts of kindness can make a difference in the community we live in. Through role play, art activities, puppet shows and more, campers will learn about core characteristics and leadership skills.

### Long Way Down

Campers discover how aerospace engineers design and test technologies by designing parachutes

### I've Got No Strings...or do I?

Our campers will try their hand at puppeteering! Students will make a puppet, come up with a storyline, build a set and put on their own show!

*\*\*Lessons may last from 1-3 days, please refer to schedule for details*

636 N. Broadway St. Moore, OK 73160
