### THREE STONES IN THE RIVER

Aaron will tell his story about the journey of coming home to the roots of Jewish tradition by way of meditation and spiritualism through songwriting. He grew up practicing Judaism and attending religious school, but after that became removed for quite some time. Not wearing his Jewish heart on his sleeve. Through writing, he found his way back to his Jewish roots. Penning songs that inspired him but he did not know but he was already on his way to writing Jewish music. Finally, by some serendipitous connections. He found himself working with the largest reform synagogue in the country writing more and more of this music for the Jewish community. Come hear all about this journey and how the power of following Hashem's call can impact the course of your life.
