Plot #16

Dear Sir/Madam,

LETTER OF APPRECIATION

On behalf of the head teacher, staff parents and pupils of the above school.

I write to thank your outfit for the wonderful work done.

We are happy your company selected our school for your first time educational program to let the learners witness the eight planets in the solar system in reality.

We express our heartfelt gratitude to you for taking time out of your busy schedule in honoring your invitation as your company promised the school.

Our hearts are singing joyful songs to your team for honoring your invitation with your beautiful presence to the Kotobabi TWMA No.2 Primary 'A' where you moved the whole school to space and made us learn real situations of the solar system.

We will forever remember such educational program like this and it has truly imparted our knowledge.

We say thank you and that God Almighty himself shower his blessings upon your company, so that your services to humankind become a blessing to those around you. Amen

Thank you.

Yours faithfully

REPORT ON COMMUNITY SERVICE IN KOTOBABI TWMA PRIMARY 'A' ON THE SOLAR SYSTEM –BY COORDINATOR

MARGARET KARIKARI 21ST OCTOBER, 2022.

INTRODUCTION:

The manager, staff of the Imperial Beyond Possibility Company. The Coordinator of the Kotobabi No.2 TWMA Primary 'A' will like to present the report of all the activities that took place on the 26th October, 2022.

GENERAL INFORMATION OF THE SCHOOL

The school was supposed to have feel of the real solar system on the 21st October, 2022 but it was not possible due to the inadequate facilities in the school. Likely a nearby church made it premises available to be used.

The team led by SAURABH SHARMA head of supply chain and Logistics was informed by the school coordinator to come and access the near place which they found convenient so the scheduled date was shifted to 26th October 2022 possible .

VENUE

The team arrived in the premises at nine o'clock (9:00 am). The gadgets were mounted at the Christ Apostolic Church (C.A.C) opposite the school.

COUNSELLING

The team gave enough counselling to the pupils and the teachers. Example not entering with sharp objects, no food or water, no footwear and how to enter and come out of the amazing planetarium. The number of learners were demonstrated on how to enter at a time and among others.

ACADEMIC EXPERIENCE

In fact the teachers dealt with the solar system theoretically but the event brought the learners closer to the real solar system. They had a great feel of the real lesson and new discoveries for example they were made to know that the sun is not stationed as we first learnt in books.

SNACKS

The learners, the teachers, and some community members were given drinks and biscuits after the program in turns. In all, about 500 people took part in the program.

CONCLUSION

In conclusion the program was educative, interesting and fun,

The Head Teacher Staff, learners and the whole of Kotobabi No.2 community look forward for more of such program from your company.

Thank you

“Ayekoo” meaning in Twi well done!
