

**FACT:** Every day the number of Albertans who reach the age of 65 grows by 65.  
**FACT: By 2031**, when there will be more than **923,000 seniors** - that's **1 in 5** Albertans  
**FACT:** For the first time, **more seniors than children** live in Canada (Census 2016)

**Meet Lorna:** Lorna moved out west to start a new life in 1980. She found work as an administrative assistant for engineering and legal firms through “temp” agencies. She found herself without benefits despite working all her life. Inglewood is home. She feels fortunate to have a subsidized seniors' apartment; but is experiencing health challenges and worries about where she will go when she needs more support.

**We all know someone; a family member, a friend, a neighbour...**

**Bernie** was found alone and immobilized in her bath tub.  
**What if a neighbour had not checked in on her?**

## ELDERHOUSE©

A new vision for dignified, safe, and affordable housing for seniors in financial need.

### A FRESH APPROACH

**A residence designed by seniors for seniors...**

It belongs in every community. It's more than a building. It's about people and caring relationships, private spaces, a friendly atmosphere, and healthy living.

**A different perspective:** Focus on *healthy living* and not managing health conditions.

**About people. Not beds:** Counting beds is for hospitals. A place to call *home* within a home.

**About belonging.** Seniors are valuable; they can contribute; they belong in *their* community.

### PROGRESS TO DATE:

Land secured. Development Permit approved. Building Permit in process.

**UP TO 24 SENIORS HELPED:** 14 Supported Living Units. 3 self-contained transitional units.
