

Capabilities Statement

Core Competencies [NICS: 238160/238170]

- Low-slope systems: our installers are certified directly by manufacturers and set the pace at +45,000 ft² installed per week.
- Metal roofs: the relationship with our various suppliers help us obtain factory-formed roofs to the most restrictive specifications.
- Shingles: have been our bread and butter installations since the owner's inception in the industry, over **thirty years ago**.
- Stucco/Stone: we retain a crew specialized in exterior insulation finishes & stone veneer, enabling us to perform additional scopes on the jobsite.

Differentiators

We set ourselves apart by making our main focus be catering to the Architects' specifications and prioritizing completion without compromising timeliness. We take pride in our performance, and as a result, we provide a **5-year workmanship warranty** on flat & shingle roofing systems. Every job gets done to the manufacturer's exact requirements to make sure full warranties are always in place. Also, even though we're a certified small business, we possess the bonding, insurance, and permits to meet requirements for large commercial/government projects.

Past Performance

- Roche: Sparrow Hawk Building Office
- Shames: City Market & Marketplace Retail
- Bassett: Glennon Heights Bathhouse & Animal Emergency/Specialty Center

Company Data

- Certified Small Business status
- <\$1 million in revenues
- <10 employees
- Incorporated since **2016**
