

**IMAGE SURVEYS LTD**

## **SOLUTION FOCUSED DRONE SERVICES**

Tailored aerial data capture for Architects, Engineers, Surveyors, Construction, Infrastructure, Local Authorities & Government Agencies.

We use drone technology to streamline surveying, inspection, and documentation processes for built environment professionals. With high-resolution visual, thermal, and 3D outputs, we deliver actionable data safely and cost effectively with minimum disruption.

### **Services**

#### **Inspections and surveys**

- 2D & 3D visualisations for terrain analysis, condition reporting and planning.

#### **Onsite Progress & Stage Reporting**

- High-resolution imaging for progress tracking

#### **Health & Safety and building code compliance**

- Remote verification of safe working procedures and correct material handling.

#### **Thermal Imaging**

- Detection of insulation defects, water ingress, and heat loss.

#### **Emergency Inspections**

- Fast-response site inspections post-flood, fire, or storm.

#### **Marketing & Training Visuals**

- Photography and video output for training and client engagement.

#### **Condition & Maintenance Reporting**

- Post-build checks (e.g., solar panels, roofing, gutters) for ongoing asset management.
