

We are Covid- ready!

Our robust Sterilization & Disinfection protocols have been further modified for the pandemic in accordance with guidelines from the WHO, CDC as well as Local & International Dental Councils and the Government.

Contact- Free Sanitizing Station before entry

Every patient as well staff member has been provided with Hand sanitizing station before entry

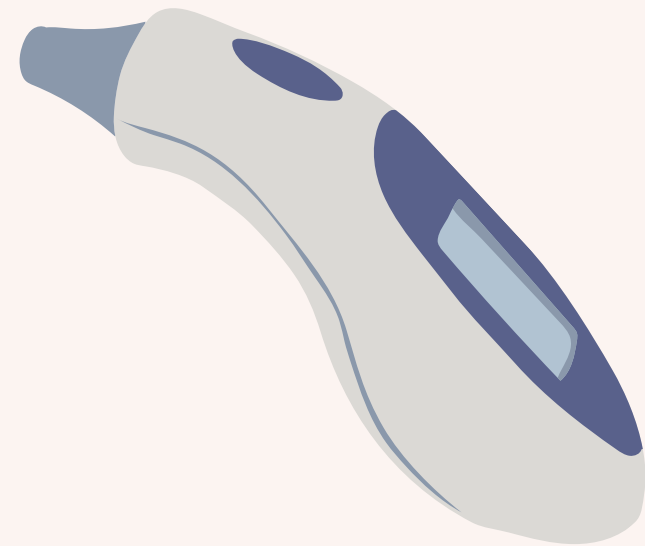

Masks

Masks are MANDATORY in the clinic for everyone and must be kept on covering the nose and mouth at all times except during treatment

Temperature Checks

Checking temperature at entry

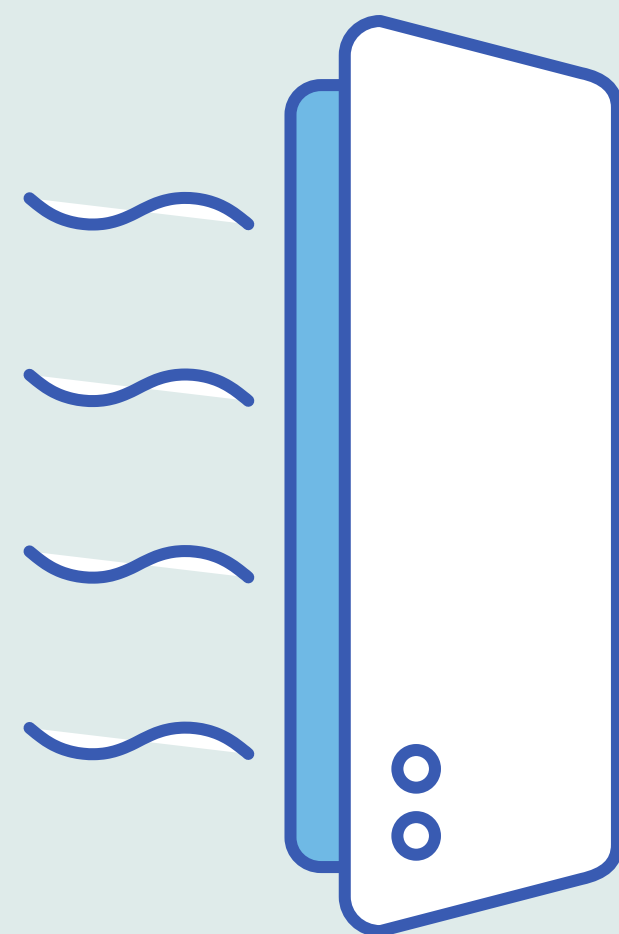

Treatment by appointments only

Ensuring detailed history, travel history is recorded before check-ups

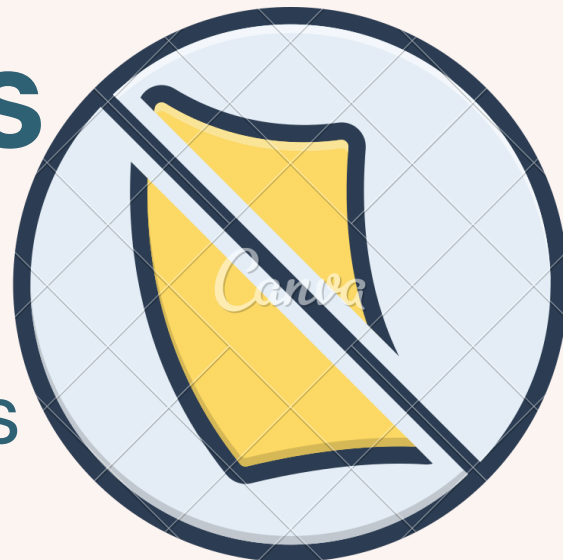

Highest Grade Hepa Filters

The best air purifiers are used to ensure maximum removal of microbes and virus

Paperless Prescriptions

Prescriptions will be sent digitally to ensure minimal contact & prevent cross infections

Digital Payments

We encourage digital payments!

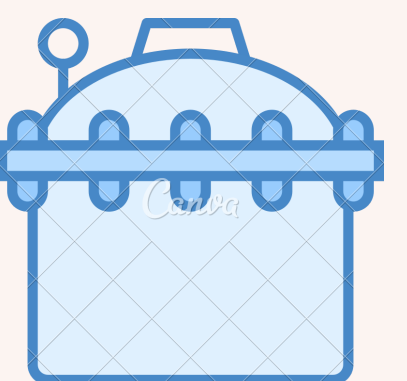

Disinfection

Disinfection of the operatory after every patient

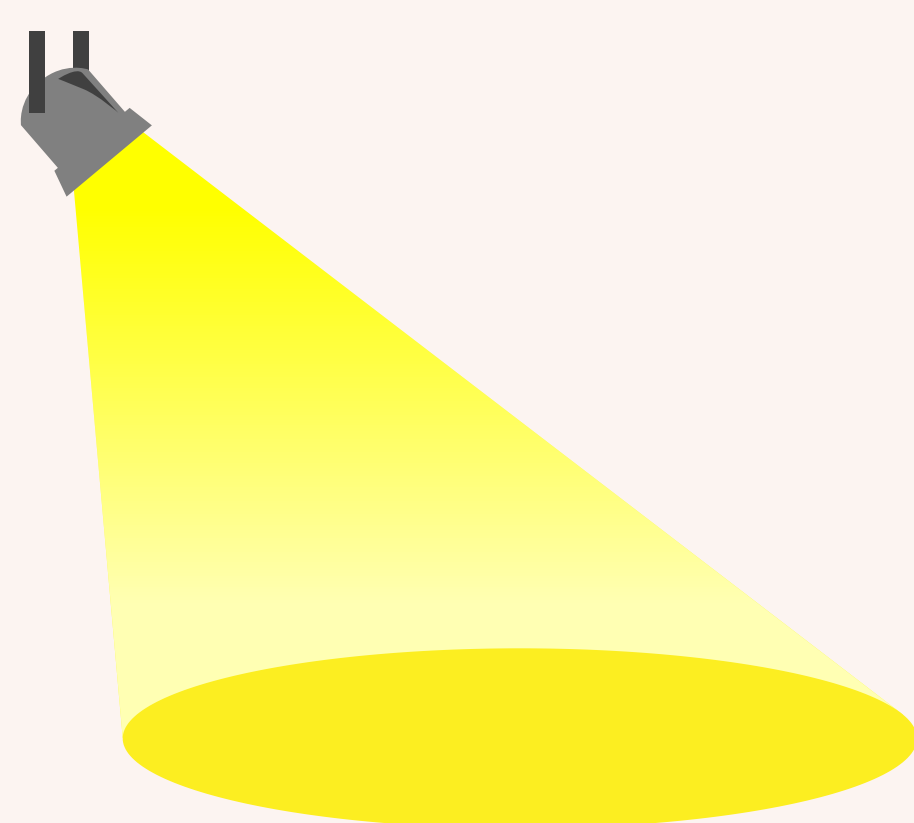

State-of-the-art equipment for sterilization

To prevent cross infection

UV Sterilization

UV lights are used to ensure sterilization. This is the same technique used in operation theatres around the world

Best quality PPE for Doctors & Staff

To serve you better!
