HEALTH RANGER SELECT ORGANIC GROUND BLACK PEPPER

- Contains high levels of piperine for optimal nutrient bioavailability
- Lab tested for glyphosate, heavy metals and microbiology

(NaturalNews) Mercury tests conducted on vaccines at the Natural News Forensic Food Lab have revealed a shockingly high level of toxic mercury in an influenza vaccine (flu shot) made by GlaxoSmithKline (lot #9H2GX). Tests conducted via ICP-MS document mercury in the *Flulaval* vaccine at a shocking **51 parts per million**, or over 25,000 times higher than the maximum contaminant level of inorganic mercury in drinking water set by the EPA.(1)

The tests were conducted via ICP-MS using a 4-point mercury calibration curve for accuracy. Even then, the extremely high level of mercury found in this flu shot was higher than anything we've ever tested, including tuna and ocean fish which are known for high mercury contamination.

In fact, the concentration of mercury found in this GSK flu shot was **100 times higher than the highest level of mercury we've ever tested in contaminated fish**. And yet vaccines are *injected* directly into the body, making them many times more toxic than anything ingested orally. As [my previous research into foods has already documented](#), mercury consumed orally is easily blocked by eating common foods like strawberries or peanut butter, both of which bind with and capture about 90% of dietary mercury.

Here are the actual results of what we found in the influenza vaccine from GSK (lot #9H2GX):

Aluminum: 0.4 ppm

Arsenic: zero

Cadmium: zero

Lead: zero

Mercury: **51 ppm**

All tests were conducted via calibrated, high-end ICP-MS instrumentation as shown in [these lab videos](#).

Doctors, pharmacists and mainstream media continue to lie about mercury in vaccines

As you take in the scientifically-validated fact that mercury exists at very high concentrations in flu vaccines, keep in mind that most doctors, pharmacists and

members of the mainstream media continue to stage **an elaborate lie** that claims mercury has "already been removed from vaccines."

Never mind the fact that the use of mercury is admitted right on the package containing the vaccine vial. And now, [Natural News](#) has scientifically confirmed the mercury content of flu vaccines using high-end laboratory instrumentation. The existence of high mercury in flu shots is irrefutable.

Anyone who claims mercury has been removed from all vaccines is either wildly ignorant or willfully lying. And anyone who would knowingly allow themselves to be injected with mercury is probably already a victim of the kind of brain damage well known to be caused by mercury.

Insert admits "no controlled trials"

Shockingly, the package insert for this flu shot readily admits the vaccine has never been subjected to scientific clinical trials:

"There have been no controlled trials adequately demonstrating a decrease in influenza disease after vaccination with Flulaval," the package insert claims in tiny text (that no one reads).

This is printed right on the insert, yet no one in the mainstream media will ever report this astonishing admission. This statement, all by itself, is a confession that **flu shot marketing is a fraud**.

Across the board, flu shots are heavily propagandized and promoted with the implication that they have zero risks while offering 100% protection. **No one in the mainstream media ever questions this claim** even though the package insert openly admits the claim is complete hokum and has never been subjected to scientific scrutiny.

No evidence of safety or effectiveness in pregnant women

But that's not all the insert admits. It also says:

"Safety and effectiveness of Flulaval have not been established in pregnant women, nursing mothers or children."

And yet everywhere you go in America, there's a Walgreens, CVS or Wal-Mart pharmacy promoting flu shots for pregnant women. Never mind the fact that flu shot safety has **never been established in pregnant women**, and never mind the obvious fact that you should never inject a pregnant women with mercury in the first place!

Who needs scientific proof when you've got the full propaganda of the media and the government to back you up? Anyone who dares question the scientific validity of flu shot safety for pregnant women is immediately attacked as being an opponent of all vaccines.

Apparently, the only requirement to be accepted by the vaccine community is to **believe in medical fairy tales** while abandoning all critical thinking and scientific skepticism. In the vaccine industry, genuine science is simply not allowed. No wonder two former [Merck virologists filed a False Claims Act](#) with the federal government, accusing the company of knowingly fabricating its vaccine efficacy data to trick the FDA.

Never proven safe or effective in children, either

Flu shots are heavily promoted for children, right alongside mumps and measles vaccines. But it turns out flu shots are never scientifically tested for safety or efficacy in children.

Check out what the insert for this vaccine directly admits:

"Safety and effectiveness of Flulaval in pediatric patients have not been established."

It's right there in black and white... an open admission. Yet flu shots are aggressively marketed to parents and children as if they were Tic-Tacs. The real beauty of the entire vaccine industry scam is that **no scientific evidence is required!** You don't have to have any proof, all you have to do is *believe* in vaccines as a matter of faith.

Never tested for cancer risk

Do flu shots cause cancer? The honest, scientific answer is that these shots are never tested for that. As the insert readily admits:

"Flulaval has not been evaluated for carcinogenic or mutagenic potential, or for impairment of fertility."

Believe it or not, the Flulaval vaccine also warns that no one should be given this shot if they've already received another flu shot at some previous time:

"Do not administer Flulaval to anyone... following previous administration of any influenza vaccine."

And yet, amazingly, people are encouraged to get flu shots year after year, even though the package insert directly warns against anyone taking a series of influenza vaccines.

Admission that flu shots contain formaldehyde and sodium deoxycholate

The same insert that admits this vaccine has never been proven safe in children or pregnant women also openly admits that it contains neurotoxic chemicals.

Per the insert, each dose of Flulaval contains up to 25 mcg of formaldehyde (a neurotoxin) and up to 50 mcg of sodium deoxycholate.

This is on top of the 25 mcg of mercury you'll get in every dose. And remember, this is mercury that's **injected directly into your body**, so you absorb 100% of this mercury (unlike mercury you eat, where most of it sticks to food fibers and is transported out of your body).

Total admission that flu shots cause seizures, convulsions and Guillian-Barre syndrome

Ever wonder what all these toxic chemicals and heavy metals cause in humans? Flu shots vaccines, it turns out, are already known to cause a huge number of devastating

health effects.

Predictably, there is a massive disinfo campaign across the mainstream media, Wikipedia, medical journals and government propaganda agencies (CDC, FDA, etc.) to pretend that flu shots have no risks whatsoever. Yet the insert that comes with the vaccine openly admits the flu shot has been linked with a long, frightening list of serious adverse effects. As this Flulaval insert says (see photo below):

"In addition to reports in clinical trials, the following adverse events have been identified during postapproval use of Flulaval...

vomiting
chest pain
allergic edema of the mouth
anaphylaxis
laryngitis
cellulitis
muscle weakness
arthritis
dizziness
paresthesia
tremor
somnolence
Guillain-Barre syndrome
convulsions / seizures
facial or cranial nerve paralysis
encephalopathy
limb paralysis
insomnia
dyspnea
sweating"

Here's a photo of this section of the package insert, complete with the GlaxoSmithKline toll-free phone number:

6.2 Postmarketing Experience

In addition to reports in clinical trials, the following adverse events have been identified during postapproval use of FLULAVAL. Because these events are reported voluntarily from a population of uncertain size, it is not always possible to reliably estimate their incidence rate or establish a causal relationship to the vaccine. Adverse events described here are included because: a) they represent reactions which are known to occur following immunizations generally or influenza immunizations specifically; b) they are potentially serious; or c) the frequency of reporting.

Blood and Lymphatic System Disorders: Lymphadenopathy.

Eye Disorders: Eye pain, photophobia.

Gastrointestinal Disorders: Dysphagia, vomiting.

General Disorders and Administration Site Conditions: Chest pain, injection site inflammation, asthenia, injection site rash, influenza-like symptoms, abnormal gait, injection site bruising, injection site sterile abscess.

Immune System Disorders: Allergic edema of the mouth, anaphylaxis, allergic edema of the throat.

Infections and Infestations: Rhinitis, laryngitis, cellulitis.

Musculoskeletal and Connective Tissue Disorders: Muscle weakness, arthritis.

Nervous System Disorders: Dizziness, paresthesia, hypoesthesia, hypokinesia, tremor, somnolence, syncope, Guillain-Barré syndrome, convulsions/seizures, facial or cranial nerve paralysis, encephalopathy, limb paralysis.

Psychiatric Disorders: Insomnia.

Respiratory, Thoracic, and Mediastinal Disorders: Dyspnea, dysphonia, bronchospasm, throat tightness.

Skin and Subcutaneous Tissue Disorders: Urticaria, localized or generalized rash, pruritus, sweating.

Vascular Disorders: Flushing, pallor.

6.3 Adverse Events Associated With Influenza Vaccines

Anaphylaxis has been reported after administration of FLULAVAL. Although FLULAVAL contains only a limited quantity of egg protein, this protein can induce immediate hypersensitivity reactions among persons who have severe egg allergy. Allergic reactions include hives, angioedema, allergic asthma, and systemic anaphylaxis [see *Contraindications* (4)].

Neurological disorders temporally associated with influenza vaccination such as encephalopathy, optic neuritis/neuropathy, partial facial paralysis, and brachial plexus neuropathy have been reported.

Microscopic polyangiitis (vasculitis) has been reported temporally associated with influenza vaccination.

7 DRUG INTERACTIONS

7.1 Concomitant Administration With Other Vaccines

FLULAVAL should not be mixed with any other vaccine in the same syringe or vial.

There are insufficient data to assess the concomitant administration of FLULAVAL with other vaccines. When concomitant administration of other vaccines is required, the vaccines should be administered at different injection sites.

7.2 Immunosuppressive Therapies

Immunosuppressive therapies, including irradiation, antimetabolites, alkylating agents, cytotoxic drugs, and corticosteroids (used in greater than physiologic doses), may reduce the immune response to FLULAVAL.

8 USE IN SPECIFIC POPULATIONS

8.1 Pregnancy

Pregnancy Category B

A reproductive and developmental toxicity study has been performed in female rats at a dose approximately 56 times the human dose (on a mg/kg basis) and revealed no evidence of impaired female fertility or harm to the fetus due to FLULAVAL. There are, however, no adequate and well-controlled studies in pregnant women. Because animal reproduction studies are not always predictive of human response, FLULAVAL should be given to a pregnant woman only if clearly needed.

In a reproductive and developmental toxicity study, the effect of FLULAVAL on embryo-fetal and pre-weaning development was evaluated in pregnant rats. Animals were administered FLULAVAL by intramuscular injection once prior to gestation, and during the period of organogenesis (gestation days 6, 8, 11, and 15), 0.1 mL/rat/occasion (approximately 56-fold excess relative to the projected human dose on a body weight basis). No adverse effects on mating, female fertility, pregnancy, parturition, lactation parameters, and embryo-fetal or pre-weaning development were observed. There were no vaccine-related fetal malformations or other evidence of teratogenesis.

Pregnancy Registry: GlaxoSmithKline maintains a surveillance registry to collect data on pregnancy outcomes and newborn health status outcomes following vaccination with FLULAVAL during pregnancy. Women who receive FLULAVAL during pregnancy should be encouraged to contact GlaxoSmithKline directly or their healthcare provider should contact GlaxoSmithKline by calling 1-888-452-9622.

If you take flu shots, you are being poisoned by quacks

The upshot of all this is that flu shots utterly lack any scientific evidence of safety or efficacy. We don't know if they work at all, in other words, and neither does the vaccine manufacturer. Neither do the doctors or medical staff who administer them. Flu vaccines are injected into people **purely as a matter of blind faith** in the very same companies that have already been convicted of felony crimes.

GlaxoSmithKline, for example, not only manufacturers this Flulaval vaccine... the company also [committed multiple felony crimes and got caught bribing doctors](#), ultimately agreeing to pay a multi-billion-dollar criminal settlement with the U.S. Department of Justice.

Trusting a flu shot made by a corporation of felons is a lot like trusting the purity of heroin you buy from a street dealer. Both flu shots and street heroin have at least one thing in common, by the way: neither has ever been tested for safety.

We also know that flu shots contain neurotoxic chemicals and heavy metals in alarming concentrations. This is irrefutable scientific fact. We also know that there is no "safe" form of mercury just like there is no safe form of heroin -- all forms of mercury are highly toxic when injected into the body (ethyl, methyl, organic, inorganic).

The only people who argue with this are those **who are already mercury poisoned** and thus incapable of rational thought. Mercury damages brain function, you see, which is exactly what causes some people to be tricked into thinking vaccines are safe and effective.

Technically, you'd have to be stupid to believe such a thing, as the vaccine insert directly tells you precisely the opposite.

Share this story, spread the truth

Share this story with everyone who needs to know the truth about flu vaccines. This message needs to get out. Every fact stated in this article is 100% true and verified. The quotes from the Flulaval package insert are on-the-record statements from GlaxoSmithKline.

And for the record, **I am not an opponent of the theory of vaccination**. What I'm against is the continued use of toxic heavy metals and chemicals in vaccines. I'm also opposed to the wildly fraudulent marketing of vaccines. If any other product were marketed with the same lies and deceptions as vaccines, they would be immediately charged with fraud and misrepresentation by the FTC. But somehow when the vaccine industry commits routine fraud, everybody pretends it isn't happening.

Even with all the marketing fraud taking place, if the vaccine manufacturers would stop

poisoning the population with vaccine additives (by removing mercury, formaldehyde and other chemicals from their products), nearly all opposition to vaccines would rapidly disappear.

HOW MUCH MERCURY IS REALLY IN A FLU SHOT?

Here's What ICP-MS Tests Revealed:

2 ppb - Maximum mercury contaminant level in drinking water set by EPA

250 ppb - Typical mercury level in tuna

500 ppb - Highest level detected by Natural News in contaminated whitefish

51,000 ppb - Level of mercury FOUND IN A FLU SHOT

(ppb means parts per billion)

ALL FORMS OF MERCURY ARE TOXIC TO HUMANS.

About the author: Mike Adams (aka the "[Health Ranger](#)") is a best selling author (#1 best selling science book on Amazon.com) and a globally recognized scientific researcher in clean foods. He serves as the founding editor of NaturalNews.com and the lab science director of an internationally accredited (ISO 17025) analytical laboratory known as [CWC Labs](#). There, he was awarded a [Certificate of Excellence](#) for achieving extremely high accuracy in the analysis of toxic elements in unknown water samples using ICP-MS instrumentation. Adams is also highly proficient in running liquid chromatography, ion chromatography and mass spectrometry time-of-flight analytical instrumentation.

Adams is a *person of color* whose ancestors include Africans and Native American Indians. He's also of [Native American heritage](#), which he credits as inspiring his "Health Ranger" passion for protecting life and nature against the destruction caused by chemicals, heavy metals and other forms of pollution.

Adams is the founder and publisher of the open source science journal [Natural Science Journal](#), the author of numerous peer-reviewed science papers published by the journal, and the author of the world's first book that published ICP-MS heavy metals analysis results for foods, dietary supplements, pet food, spices and fast food. The book is entitled [Food Forensics](#) and is published by BenBella Books.

In his laboratory research, Adams has made numerous food safety breakthroughs such as revealing rice protein products imported from Asia to be [contaminated with toxic heavy metals like lead, cadmium and tungsten](#). Adams was the first food science researcher to document [high levels of tungsten in superfoods](#). He also discovered [over 11 ppm lead in imported mangosteen powder](#), and led an [industry-wide voluntary agreement](#) to limit heavy metals in rice protein products.

In addition to his lab work, Adams is also the (non-paid) executive director of the non-profit [Consumer Wellness Center](#) (CWC), an organization that redirects 100% of its donations receipts to grant programs that teach children and women how to grow their own food or vastly improve their nutrition. Through the non-profit CWC, Adams also launched [Nutrition Rescue](#), a program that donates essential vitamins to people in need. [Click here](#) to see some of the CWC success stories.

With a background in science and software technology, Adams is the original founder of [the email newsletter technology company known as Arial Software](#). Using his technical experience combined with his love for natural health, Adams developed and deployed the content management system currently driving NaturalNews.com. He also engineered the high-level statistical algorithms that power [SCIENCE.naturalnews.com](#), a massive research resource featuring over 10 million scientific studies.

towards the beginning of your article, you mention vaccines contain mercury levels of 51 parts per *million*, yet the infographic at the bottom lists comparisons in parts per *billion* (with mercury also in ppb). Did I miss something, or is this perhaps a typo? That's a rather large discrepancy..

Greg Payne • 4 years ago

Interesting to see you have a lab at your disposal. No one questions the results of your analysis. What is involved with the hazardous testing for Nagalase?

^ | v • Reply • Share ›

Shill? Any Evidence? • 4 years ago

Do you drink flu shots every day by the gallon?

2 ^ | v 1 • Reply • Share ›

john ➔ **Shill? Any Evidence?** • 2 years ago

Read the whole article. If you eat/drink mercury and take it in orally: "where most of it sticks to food fibers and is transported out of your body". This vaccine is injected directly into your blood stream and absorbed by the body.

^ | v • Reply • Share ›

Shill? Any Evidence? ➔ john • 2 years ago

"This vaccine is injected directly into your blood stream and absorbed by the body."

Show me one vaccine injected directly into the bloodstream. That's IV or Port a cath

I.V. OF FORT-A-CATH.

1 ^ | v • Reply • Share ›

Vaidya Rupesh Gupta ➔ Shill? Any Evidence? • 2 years ago

Then where does the vaccine finally goes? It goes to the muscle tissue via IM injection, in the adipose tissue via SC injection, Oral drops finally end up into the blood stream or not?

The question in my mind is, What happens to particulate heavy metals in our body, before and after these are absorbed by blood and other tissues?

^ | v • Reply • Share ›

Shill? Any Evidence? ➔ Vaidya Rupesh Gupta • 2 years ago

Where it finally goes is irrelevant to whether or not it is injected directly into the bloodstream.

As for oral stuff eventually ending up in the blood stream? Yes, that's part of the reason why diabetics check their BLOOD sugar before and after eating.

1 ^ | v • Reply • Share ›

John Debarr ➔ Shill? Any Evidence? • 3 years ago

Good point...should be noted that 25,000 times the volume of one flu shot would be equivalent to what one drinks in water in a single day. Since the flu shot is once a year, then the flu shot has 1/365th the yearly mercury exposure of water, given water had levels of mercury just at the legal limit.

1 ^ | v • Reply • Share ›

H S ➔ John Debarr • 2 years ago

There are 0.32 parts per million of mercury in a can of albacore tuna. We are told it's safe to eat once a week. In a year we'd then

we are told it's safe to eat once a week. in a year, we'd then consume ~16.64 ppm. 6+ ppm at one time would be considered excessive mercury exposure. The link provided shows how one woman had her hair tested and with a level of 13.3 ppm, was losing her hair, had hand tremors, lost the ability to play an instrument, and felt weak. I'd say taking a massive dose at one time (of anything) isn't a good thing. <http://mercurypolicy.org/wp...>

^ | v • Reply • Share ›

EthicRanger → John Debarr • 3 years ago

Lets see in this perspective: If I hit you 25000 on the edge of harming punches in 1year, would you survive?

If I concentrate those punches in 1 x25000 punch will you go for it?

What if i add some maybe x1000s kicks in that same action from other toxic materials which are in that same shot?

Also we don't know how all these toxins interact in between each other additionally.

Also it's based on water limit which goes orally to give a chance to body to prepare and do something about toxicity, but we bypassing that , making that punch direct in to blood.

How about that?

1 ^ | v • Reply • Share ›

fanofjesus → Shill? Any Evidence? • 3 years ago

probably not, but do you realize that any amount of mercury in your body is dangerous? I would not want even one dose! And think of how many different vaccines "they" are pushing on the public

Was this the multi-dose or the single dose vaccine?

^ | v • Reply • Share ›

Jim Jones Koolaid → Jennifer R. • 4 years ago

single dose shouldnt have mercury(Of course buyer beware), its a preservative so when you insert a needle multiple times nothing else grows insid ethe bottle.

^ | v • Reply • Share ›

Elizabeth • 5 years ago

Do the math. A flu vaccine is 0.5 mL. The average person drinks gallons and gallons of water and water-based beverages per year. Do the conversions and you'll find out you're ingesting several thousand times more mercury in your water than is present in a flu shot.

5 ^ | v 1 • Reply • Share ›

Geoff O'Furman → Elizabeth • 4 years ago • edited

Apparently, math is too hard.

The point, folks, is that comparing the mercury in a vaccine to the EPA levels for drinking water is ridiculous. And you folks, vaccine experts that you think you are, should know that there is no mercury in childhood vaccines and hasn't been any since 2001.

2 ^ | v • Reply • Share ›

Leroy Ralph → Geoff O'Furman • 3 years ago

Really and the earth is flat too! Be dumb and not educated...I for one wouldn't. Trust any of their vaccines or DRUGS for that matter...open you mind and do some research...DAAAA

^ | v • Reply • Share ›

Jennifer R. → Elizabeth • 5 years ago • edited

If you drink gallons of water in one day, you will die, and we are talking about acute poisoning, not chronic poisoning. A baby typically only consumes about 24 ounces of breastmilk in a day, not even a gallon. As far as the acute or chronic toxicity of water, many do use reverse osmosis filters and avoid seafood to minimize their mercury exposure

^ | v • Reply • Share ›

Geoff O'Furman ➔ Jennifer R. • 4 years ago • edited

What do babies have to do with anything? There is no mercury in vaccines given to babies.

1 ^ | v • Reply • Share ›

Jennifer R. ➔ Geoff O'Furman • 4 years ago

Yes, there is. It's in the annual flu shot, given to the mother during pregnancy (which goes through the placenta) and again annually starting at 6 months old.

1 ^ | v • Reply • Share ›

FallsAngel ➔ Jennifer R. • 4 years ago

Thimerosal-free flu shots are available. The thimerosal-free vaccines make up about 2/3 of the flu vaccine market in the US.

1 ^ | v • Reply • Share ›

Jennifer R. ➔ Geoff O'Furman • 4 years ago

Yes, there is. For one, the flu shot that is given to pregnant women, and babies starting at 6 months, is still often preserved with mercury-containing thimersol; several others have trace amounts left from processing.

Likewise use your own. This is ethyl mercury. Your body can easily deplete the minuscule amount in a vaccine. It does not bioaccumulate.

^ | v • Reply • Share ›

Colin Young ➔ Geoff O'Furman • 3 years ago

Apparently, bio-accumulate doesn't mean what you think it means.

Not only does Mercury bio-accumulate but it also bio-magnifies. It is also classified as a bio-toxin.

Geoff O'Furman ➔ Colin Young • 3 years ago

Methyl mercury bio-accumulates. Ethyl mercury does not.

Jim Jones Koolaid ➔ Geoff O'Furman • 4 years ago

Unless say a doctor fails to shake up the vial(the same doctors who usually have a 70 percentish+ handwashing failure rate). Mercury has a very long half life in the human body. Interestingly the Japanese did a study where they checked for heavy metals during an autopsy(which I would call the gold standard for testing) and they were getting estimates of half lives of heavy metals around 10x what US doctors estimate it to be.

Let's put aside the vaccine debate and whether you agree with it or not for a second. Instead, let's analyze this article that is filled with logical fallacies...

You do realize you can opt out of mercury containing vaccines? The PPM is low either way.

^ | v • Reply • Share ›

Jim Jones Koolaid ➔ TJ • 4 years ago

Sure no mercury, and we'll just ignore the fact that there are no studies showing it is safe to inject or even works. I might as well inject motor oil, at least its cheaper.

^ | v • Reply • Share ›

TJ ➔ Jim Jones Koolaid • 4 years ago

Actually, there are. How do you think it gets approved? There are clinical trials and studies.

Linda bender • 5 years ago

Well maybe the reason no one has heard about all these people with adverse reactions is

Because we are to busy going from doctor to doctor.

2013 I had flu. Shot and tetanus. I began with drop foot then right side of my body weakness. Cognitive issues and memory loss. Blurred vision and bad head tremors. I have had to quit two jobs. Medical test over \$15,000. Two neurologist, one rheumatoid doctor and many test. Excuse my spelling. I am a fifty-five year old who has never been sick in my life. They have ruled out many many disease

has never been sick in my life. They have ruled out many many disease.

So who has any idea what happened to me?

fanofjesus ➔ Linda bender • 3 years ago

I'm afraid that you have been a victim of the satanically-controlled medical establishment. To correct satan's destruction, one must turn to Jesus Christ, Who alone can save us from evil.

The label on the flu shot vaccine (see above) says it all. Also note: St. Jude Children's Hospital warns visitors to stay away for a period of time if they have had live vaccines...and they list which ones do...

happyinharned • 5 years ago

So everytime we drink water we are being, or could be being poisoned with mercury.....is this also what you are saying. People say don't drink soda, but I think all the stuff they put in our water isn't any better for us either.

1 ^ | v • Reply • Share ›

LeAnn Addleman ➔ happyinharned • 5 years ago

So get a good quality filter for your water. Water is still the best for us to drink.

My quest for a cancer cure took me back in history....Facts about how and why modern medicine is today. Lots of reading. Bottom line: Modern medicine is nothing more than a well planned and publicized pharmaceutical drug ring. Politically connected, the investors created laws to protect their medical investments by deeming natural medicine ineffective and it's prescribers as quacks. History shows the AMA does not protect the interest of the public, but this modern business of man made petroleum based products. The medical schools are tweaked towards prescribing these and only these drugs(or medical licenses revoked). It is the scam of scams. (btw these investors themselves fanatic users of natural medicine) It IS all about money. With that said, I trust vaccines as far as I can spit. I read the history and it's all bad. We've been taking for a ride the last 100 yrs. It's time to learn the important truth. Take responsibility for your own health before it's too late!

Oh, just great! There is a tiny amount of Mercury in CFL's sold and if they shatter we

are instructed to use biohazard techniques to dispose of the inherent mercury in the pieces of broken bulbs. Now, we are told we are ingesting Mercury in flu shots here in the US

into our blood streams? What the heck is going on in this Country? Has common sense gone out the door?

It Happens • 5 years ago

I've noticed on numerous discussion boards the following: "If Ebola vaccines ever come to Canada or the U.S., those opposed to vaccines will be the first ones to beg for them. My reply to those comments are: "What do you call a bad reaction to an Ebola vaccine? "A Zombie Bola".

gadrogeek • 5 years ago

Right now, as I write, our national broadcaster, the CBC, has 4 doctors on a "news" panel continuing the lies. For example, there is more mercury in tuna than in vaccines. It is appalling that so-called journalists have been "bought" by political and industrial influences. Clearly, neither the FDA nor Health Canada have a real mandate to protect us. It is all about the money!

2 ^ | v 1 • Reply • Share ›

todosLD ➔ gadrogeek • 5 years ago

...because there is more mercury in tuna than in vaccines.

I don't know where the author is getting their facts, but mercury in the flu vaccine isn't new. Always been there, in incredibly tiny amounts that are perfectly safe for humans. And bonus fact: there is more than one kind of mercury. This is NOT the same kind as what you would find in the hazardous thermometers that I had to stick under my arm as a kid.

If your argument is that journalists have been "bought", you need to self reflect and see exactly how extreme your opinions have become. I agree that journalists aren't all squares, but most of them are more interested in serving humanity than destroying it (at least, the ones I know anyways).

Tell us what compound made with lead is safe, and if that is the case, why they kept using the unsafe lead compounds in all those recalled toys? What compound with cadmium is safe, also, and why aren't they using it in place of the unsafe cadmium in paints?

There's a difference between methyl and ethyl mercury.

Methyl mercury accumulates. It's the mercury in fish. It's the toxic mercury. Ethyl mercury does NOT accumulate and is not the mercury associated with toxicity.

Ethyl mercury is in a variety of substances but it's not in MOST vaccines despite what's alleged in this article. It is in the multidose flu vaccine which is not a secret but stated quite plainly on the FDA website.

Difference between ethyl and methyl mercury:

<http://www.decodedscience.c...>

No one, including the FDA said thimerosal had been removed from every vaccine. It's listed right on the FDA website:

<http://www.fda.gov/Biologic...>

Thank you for allowing these corrections to be posted.

Curious_about_Satanism ➔ zarnon • 5 years ago

Most importantly is the fact of what is repeating itself clinically. And that is the fact that children all across the globe are neurologically decompensating immediately after receiving injections. It blows my mind how well intentioned honest people in society can't accept the fact that this is suspicious enough to warrant much intensive scrutiny and further research. If people learned of

a restaurant that people were getting sick from, even 10 people in a year, they would question it and probably not go there. However, you have tens of thousands of people having reactions immediately after a vaccine and there is no concern? Mind boggling.

3 ^ | v 1 • Reply • Share ›

happyinharned → Curious_about_Satanism • 5 years ago

I am a nurse and have received the vaccines. I have also administered lots and lots of flu shots with absolutely NO ADVERSE reactions.....Where exactly are they seeing all these tens of thousands immediate reactions....

3 ^ | v 1 • Reply • Share ›

Curious_about_Satanism → happyinharned • 5 years ago

First, people who have treated kids immediately following a vaccine who neurologically decompensated. If you wish to call me a liar or don't believe me, that is your choice. But your argument is like me saying that all people who claim to be mugged aren't simply because I have not seen it. The world is a much larger place than your little bubble.

Second, you live in a world where you only act on illness when it is in full swing. You have no ability to treat someone unless there is an abnormal lab test. And we see how this is working with the current state of healthcare. You seem to believe disease just shows up without any process being involved. And you believe that the body has no ability to heal itself or protect itself. That is the virtue of your medicine which you work, is it not?

All disease that your medicine claims is non curable is in fact curable. I've worked with people who have done it, and I have also helped people myself when your medicine grew their chart to 1-2 inches in thickness. But keep preaching what you think you know.

3 ^ | v • Reply • Share ›

MikaNika → Curious_about_Satanism • 5 years ago

Pretty rote argument there, the person in the previous comment claims to be a nurse who administers vaccines, therefore she is more likely than most to be present when these "immediate reactions" occur hence your argument for that part making no sense. Afterward you claim she lives in a world where she only acts on illness once it is in full swing
