## NEWS AND UPDATES

### HERE COMES THE SUMMER SUN

Summer is the most challenging time for pool service. Not only because of the hot working conditions but also due to the difficulty of keeping the pools clear of algae with our once-a-week visits. There are a lot of factors working against us.

**To prevent algae growth, each summer we prepare by:**

- 1.) Extending the pump run time to eight hours.**
- 2.) Increase the demand of chlorine, both liquid and chlorine tablets.**
- 3.) Reducing Phosphate levels, which is a food source for algae.**
- 4.) Rinse off before you jump in! (Especially after lake water)**

**Happy Swimming!!**

### Gate Locks

To make it easier for our team, we suggest having a combination lock instead of a key lock on your gates. This makes your equipment and pool easily accessible and more time effective for us!

If you would like a 4-digit combination lock, you may contact our office and we can set a code for you and place it on your gate free of charge!

### Filter Cleanings

Pool filters collect everything that goes into your pool water. This includes dirt, oils, minerals, contaminants and more. To avoid a clogged or backed up filter it is important to clean it regularly.

**Filter cleanings should be performed at least every 6 months depending on your pool and are \$75.00 + Parts (If needed)**

Please call our office to schedule!

### Customer Referrals

Summer is around the corner; Refer a Friend!

**For every New Customer that signs up for services with us; you will receive a \$25.00 credit on your Bill, and your Tech gets \$25.00 too!**
