NEWS AND UPDATES

Pool Drains & Soda Blasting

We are quickly approaching summer; we recommend that your pool is drained annually but at a minimum every 2 years. Call the office to schedule your pool drain

IMPORTANT REASONS TO DRAIN YOUR POOL

- Chemical Effectiveness
- Calcium buildup & staining
- Total Dissolved Solids

*See back page for more info

MONTHLY SERVICE AMOUNT

To keep up with the rising costs of supplies, fuel, and chemicals

May 1, 2022

The following fee schedule will apply:

- **Existing Customers**
Full Service \$105.00 + Chemicals
- **New Customers**
Full Service \$125.00 + Chemicals

Full Service Includes:

Skimming, Brushing, Empty Skimmer Baskets and Vacuum as needed

We feel this is the fairest way to keep up with the ever-changing economy and price increases

Service Calls And Repairs

Service Calls:

\$35.00/ ½ hour or less

Holiday or Special Cleans
\$50.00

Labor for Repairs + Parts:
\$70.00/hour

After Hours Calls
\$150.00/hour

Normal Hours of Operation
MON-FRI 8:00 a.m. to 5:00 p.m.

FILTER CLEANS

We have caught up on the filter cleanings that were previously behind.

It is very important to the maintenance of your pool to do filter cleanings at a minimum- of every 6 months and in sandier areas it may be more often.

We will be adjusting all filter cleaning schedules to be in the following months *February, March, and April* and *September, October, November*

Past Due Accounts
Accounts that are not paid by the 16th of each month will receive a \$10.00 Late Fee.

Billing Options
Paper Billing-\$5.00 monthly
Paperless-No Fee
Auto Pay-No Fee

IMPORTANT REASONS TO DRAIN YOUR POOL

Chemical Effectiveness- We recommend a complete pool drain every year but at a minimum every two years for a healthy pool, this will also help lower chemical usage and calcium deposits on tile surfaces. Pool water that has been treated with chemicals regularly, can become impossible to clean with chemicals after years of use. Draining your pool and refilling it will give it a fresh start. Pool water is exposed to chemicals over the years and over time this can cause the pool to be more challenging to clean. If you and others use your pool often, there are also biological remains like oils from people's skin and hair, and dead skin cells. On top of pure biological remains, there can also be chemical remains like hair spray, sunscreen, makeup, nail polish, and tanning lotion, among others. Sometimes you can drain and refill the water only, while other times, you may have to clean the floor and walls of your pool with an Acid wash, Chlorine Wash or Soda Blasting of Tiles.

Calcium buildup and staining- Living in area that has especially hard water such as Lake Havasu City, can cause calcium deposits to form as the water evaporates during the summer months. When the good water evaporates consistently it causes more calcium to build up on the tiles over time and can become harder to remove therefore, making it necessary to drain the pool and do a soda blasting. Draining your pool annually will help to slow this process.

Total Dissolved Solids (TDS)- The most important reason to drain your pool is TDS levels. When TDS levels get too high, they interfere with the chemicals that keep the water sanitary and clear. If the TDS is high, it will take more and more chemicals to balance the water which can be harsh on the skin and even damage the pool itself. A point is reached where the water cannot be maintained properly no matter how many chemicals are used. We recommend draining your pool every year preferentially and every 2 years at the most to keep TDS levels low. How often your pool needs to be drained depends on several factors, including overall use. If the pool is partially drained every winter, this dilutes TDS levels and will extend the interval between complete water changes.
