PHOENIX EQUIPMENT COMPANY

Phoenix Chopper Systems are built for durability with stainless steel fluid pumps. Configurable as external or internal mix, they operate at high pressures while maintaining consistent performance and accuracy.

Standard systems include a 25 ft (7.5 m) hose, with extensions available, and feature hardened components and long-life seals to reduce maintenance. The system includes the Phoenix "5000" gun (configurable for external or internal mix) and the PRC-5200 chopper assembly. Maintenance is simplified with resin pump quick-pin disassembly, while the "OptiSlave" catalyst slave system and micro-adjustable dispense percentage ensure precise control. Additional features include "no-leak" upper seals, an easy-access control valve, a complete spare parts kit, and a 1-year warranty.

Model	Output GPM	Available Ratios
Apollo	2.4	8:1, 13:1, 20:1
Atlas	3.7	5:1, 8:1, 13:1
Hercules	6.8	4:1, 7:1, 16:1
