

PHOENIX EQUIPMENT COMPANY

Phoenix RTM Systems are built for durability with stainless steel fluid pumps. Available in Several Pump Ratios to Fit your needs! They operate at high pressures while maintaining consistent performance and accuracy.

Standard systems include the Phoenix 5000 Internal Mix Gun for consistent, high-quality application, along with a quick-pin resin pump disassembly system that simplifies maintenance and minimizes downtime. Long-wearing pump seals, hardened internal components, and no-leak upper seals are designed to maximize reliability and extend equipment life. The system includes the advanced OptiSlave catalyst slave system with micro-adjustable catalyst percentage control for accurate, repeatable dispensing, complemented by a durable stainless steel catalyst pump. An easy-access control valve enhances day-to-day operation, while the standard 25 ft (7.5 m) hose set provides excellent working reach (additional hose footage is available if requested) Every system also comes complete with a spare parts kit and is backed by a 1-year warranty for added confidence and peace of mind.

Model	Output GPM	Available Ratios
Apollo	2.4	8:1, 13:1, 20:1
Atlas	3.7	5:1, 8:1, 13:1
Hercules	6.8	4:1, 7:1, 16:1
