The Radio Guys Newsletter

## In This Issue

- Battery Replacement
- Organized Charging
- Kenwood Rebates
- Fun Zone

## Power up!

Many of you are returning to the workforce and find your radio is not only a little dusty but it's also having some issues.

Is your battery only lasting a few hours?  
Does your radio beep randomly?  
Is your radio not functioning properly?

Chances are your battery needs to be replaced. If it is more than three years old, you've gotten more life out of it than expected!

We understand how critical communication equipment is for safety and daily operations. Give us a call and we'll get you back up and running at full speed.

## Fleet Charging Solutions

Charging all of your radios in one location can take up unnecessary space and it ends up looking like a cluttered mess- but it doesn't need to! Six and twelve unit chargers are available to solve that problem with a 20" x 5.8" footprint, and there is a wall or vehicular mount option available. Charging positions can be customized if you have different model radios too!

## Rebates are back!

Kenwood has brought back rebate offers for Nexedge model radios. There are inventory/availability issues with certain model radios, however, we are stocked with options! Rebates are available through the month of June. Give us a call and we'll help you get the best bang for your buck!

## Snapshots 😊

Here's a small glimpse into what we've been up to. As always, thank you for your continued trust and support!
