

# MISSION AND VISION

ARDF

The organisation started as a leprosy and tuberculosis project and has expanded to various other rural development projects under the fields of **basic education, hygiene and employment for women.**

Acwerk has achieved 18 years of **leprosy disabled management, rehabilitation, and evening schools for underprivileged children** followed by the **AAM preschool** project.

Acwerk looks upon developing rural areas through education, awareness, employment and other hollistic activities to bridge the gap between the diversities that exist in our world and to promote and sustain world peace.
