ABOUT US

Our firm provides security services as part of a holistic approach to risk mitigation and protective services. We hire individuals directly from the Law Enforcement, Military and Intelligence-Communities to include those with background experience in CONUS and OCONUS contract work.

Primarily focused on serving the United States Government Critical Infrastructure sectors with physical security support, company executives bring extensive experience in austere and direct-action environments to include the middle east, Africa, central America and Asia.

Our unique experience has brought significant risk reduction results to protect some of the Nations's top Fortune 500, Oil and Gas, Power Generation and Federal Government clientele. Headquartered in the United States, our network of affiliates stretches across the globe to include notable Government Agencies, NGO's and commercial sectors.

PAST PERFORMANCE

Security Services: National Oceanic and Atmospheric Administration (NOAA): Providing roving security patrol and watchstander services for NOAA property at various locations.

Security Patrol Protective Services: National Aeronautics and Space Administration (NASA): Providing static and roving patrol for NASA research operations for the ARTEMIS program.

EC Source Services: Security Services: EC Source - Ten West Link Transmission Project - providing access control security to fixed sites and 4x4 mobile patrol of critical infrastructure sites, and right-of-way patrols spanning across multiple states and jurisdictions over 125 miles, including Federal, State, County, and private land. This is a predominantly isolated Right-of-Way (ROW) security operation with a focus on laydown yards and substations requiring guards for heavy equipment and materials used in the \$280 million construction of a heavy transmission line.

READY TO ASSIST

All Terrain Protection Services stands ready to partner with you, offering expertise and dedication to ensure the success of your projects and missions.

We are proud to serve the U.S. Government, State, and local agencies, contributing to their safety, security, and overall success. Contact us today to - explore how our capabilities can enhance your operations and projects.
