

Introducing All Terrain Global Inc.

Started in 1996 by seasoned military and emergency services command staff members, All Terrain has served clients in high-threat environments in a variety of sectors offering Fire Prevention/Protection, Rescue and Security Protective Services. The company and its executive staff have significant past performance and operational experience in multiple geographic areas offering adaptable solutions and contract vehicle administrative support.

Our Approach To Customer Service

All Terrain is a mid-sized company delivering industry leading responsiveness to our clients.

We assign a single Executive Point of Contact (EPOC) to answer any questions you may have, work with you to solve your needs and build a tailored proposal & price quote. Your EPOC will be with you from start to finish.

If the contract calls for field teams to deploy, you will be introduced to the direct team Supervisor that will be on the ground day-to-day. All Terrain is relationship driven. You should feel confident that you are getting the best operators in the business.

You will have access to our past performance and references to call at any time.
