30 seconds

Think data security is just a BIG business issue? Think again. If you're a small business owner, "data security" is a big "trust" issue for your customers. Research show that buyers <u>look for evidence</u> that a business protects its data. What's more...data thieves are <u>targeting</u> small businesses.

So if you're a small business owner, here's a great solution. The Better Business Bureau introduces **Data Security – Made Simpler**, which arms small business owners with the information and tools to protect your customers...and your business. BBB partnered with data security experts at <u>Symantec</u>, <u>Visa</u>, <u>Kroll's Fraud Solutions</u> and <u>NACHA</u> – The Electronic Payments Association - to produce FREE, easy-to-understand data security guidelines, checklists and links to resources that <u>make sense</u> for small businesses.

If you own a small business, visit <u>bbb.org</u> and download a FREE copy of **BBB's Data Security – Made Simpler**. That's <u>bbb.org</u>.
