

HEAVY DUTY  
FINE QUALITY

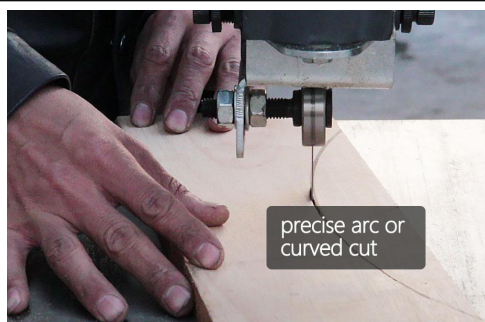

C396 INDUSTRIAL  
BAND SAW  
ENG SERIES

## AXTRA INDUSTRIAL BAND SAW

Is Axtra Equipment grade series which features by classical decades mature technology, heavy duty, precision stable running and life long use. Whole structure is solid and robust for a quiet and stable running, cast iron table and rip fence for life long use.

Saw wheel 600mm make cutting throat reaches 290mm and equals to 11.5 inches, max 80mm width blade acceptable for very heavy duty cutting work, Precise blade clamping and bearing guiding system makes a very precise cutting and very smooth and clean cutting surface. Breaking system is a electrical plus mechanical model which can stop a fast speed running blade with-in few seconds.

Double dust collection mouth 110mm diameter gives a very effective dust cleaning, and due to the powerful motor and 2 cast steel wheels, it can make a very fast cutting, tilting function table meet any challenge of creative work.

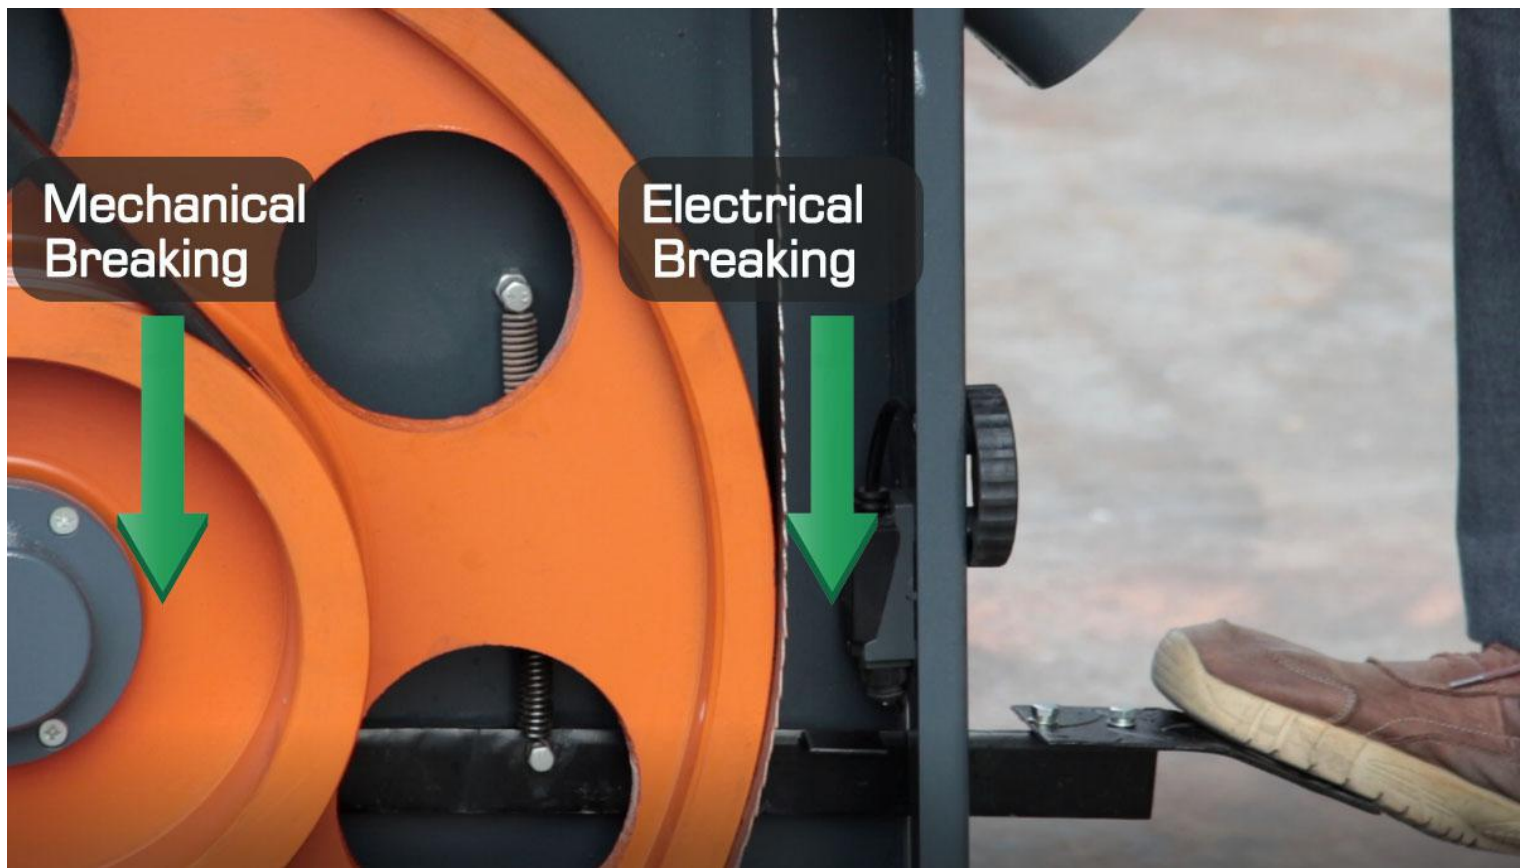

### **Solid heavy structure**

Is key point why Aextra bandsaw works life long and very beautiful sound, all precise process fluent running and no vibration.

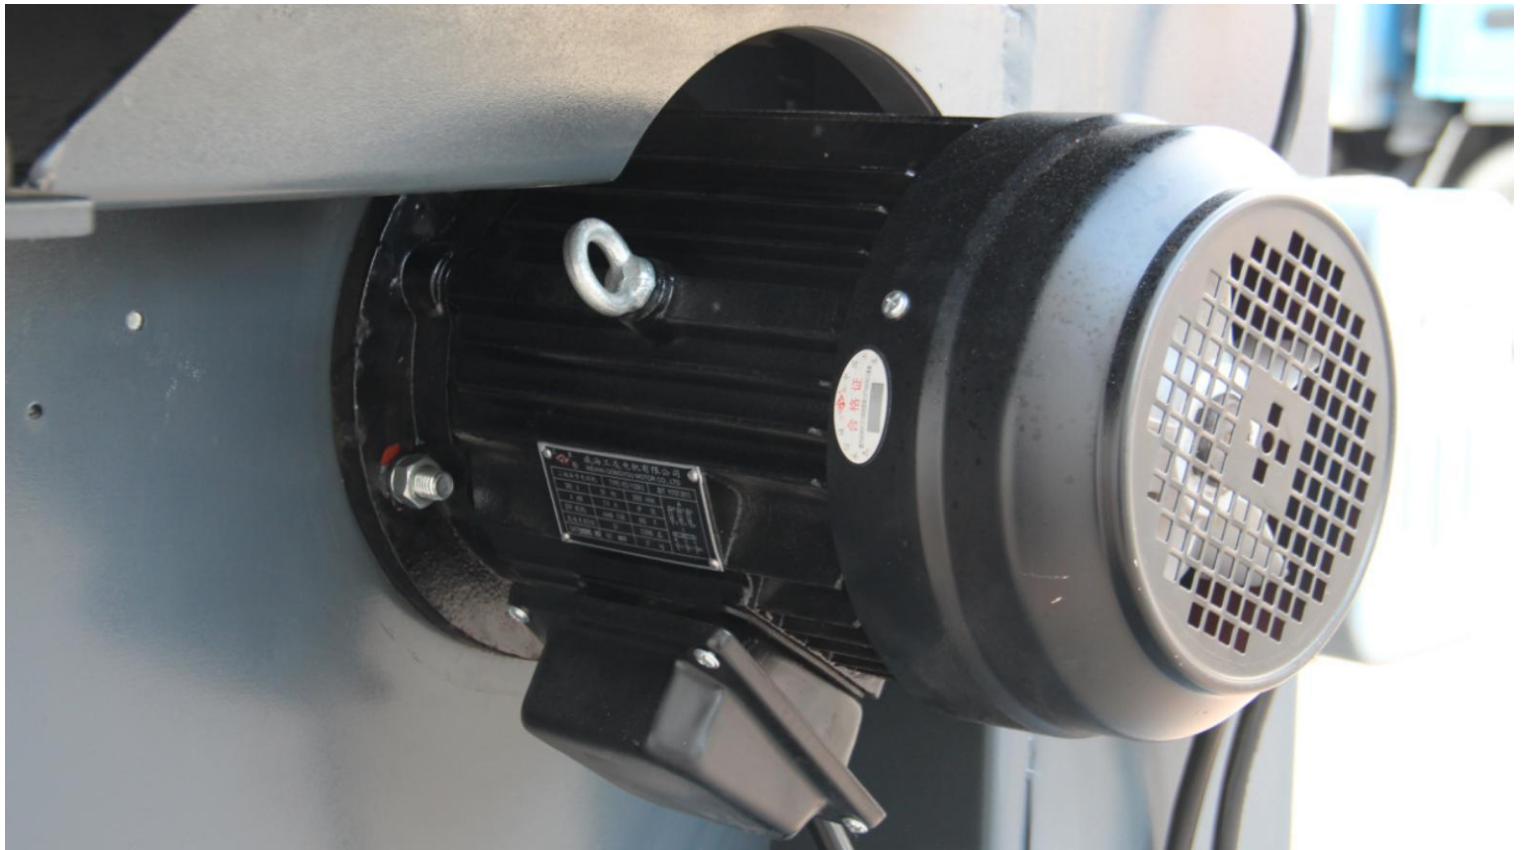

600mm Cast steel High precise lathing and balanced saw wheel gives powerful drive to enable a very efficient cut and perfect cutting surface.

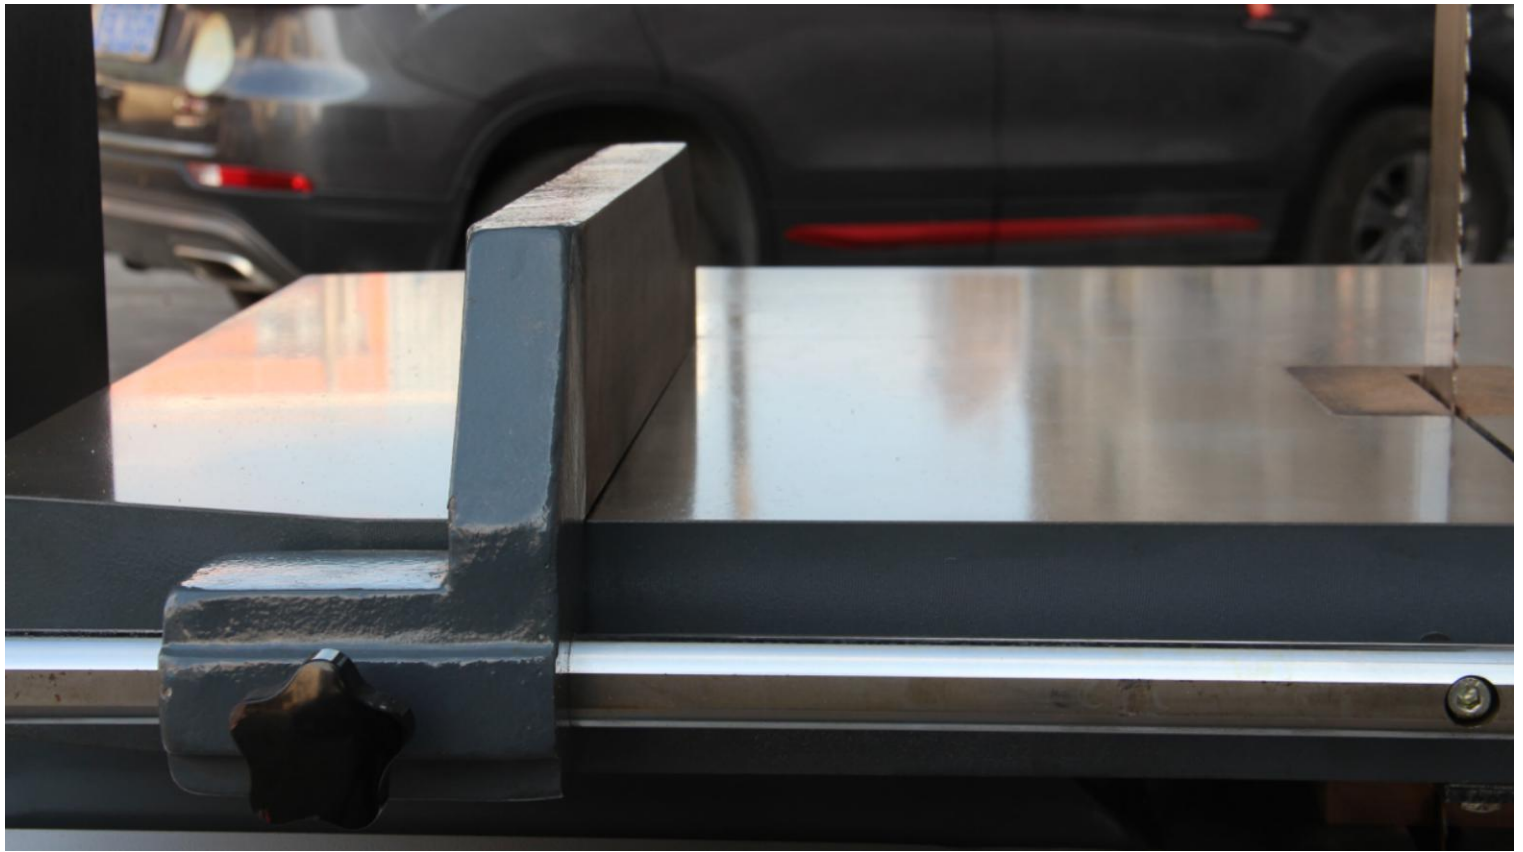

### Breaking system

Combination of electrical break and mechanical break, electrical break is from the breaking of motor, mechanical break from the saw arbor, this makes a very quick wheel and blade stop if any conditions happens, extremely safe.

The 4kW motor CE certified model gives very powerful running and got electrical breaking function

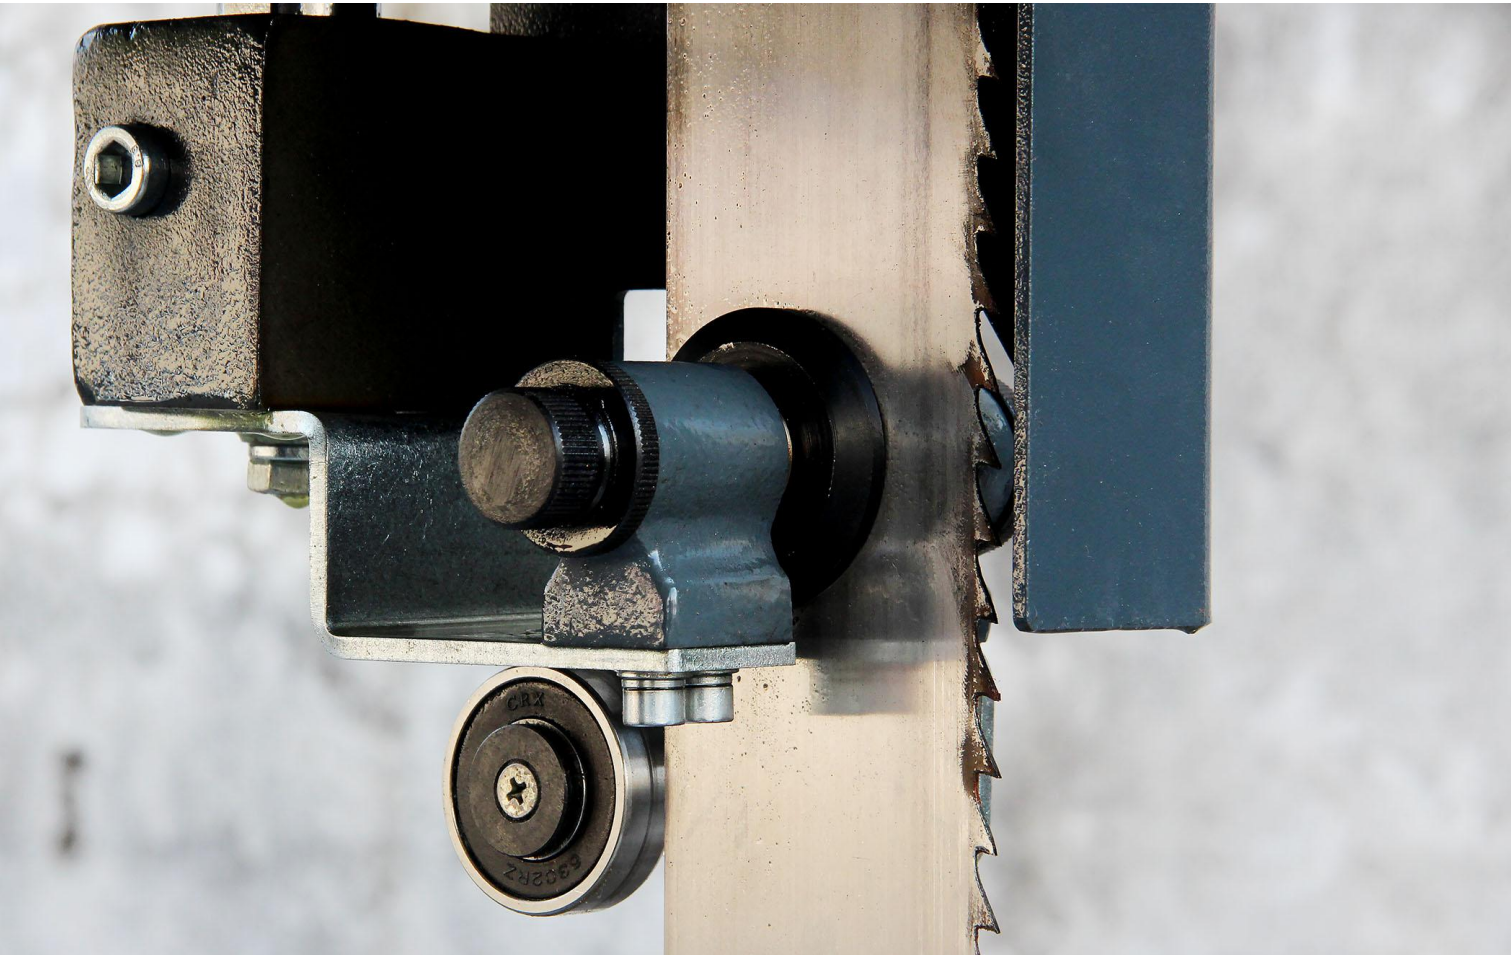

Solid cast iron mirror like grinding for smooth feeding, solid robust rip fence for life long precision.

### **Table tilting function**

Table tilting function makes it very versatile and flexible use and meet challenge to any creative design and works.

**Blade precise guiding**

The blade guiding system is a combination of bearing which give support for back and forth and right and left heavy duty clamping to make sure there vibration of blade is minimized all this makes bald run precise and gives a very smooth cutting edge.

**PARAMETES**

Cutting throat	290mm equals to 11.5inchs
Table size	W820W*L700mm
Blade to machine neck distance	650mm
Saw wheels	600mm diameter
Blade width	20-80mm
Blade circle	4550-4580mm
Power	4kW
Weight	650kgs
Size of machine	1170*800*2100mm
Dust collection mouth	110mm

Other models

			
<p>345 Ligh duty high precision band saw for shop and light duty precise cutting</p>	<p>Heavy duty 397 saw max 370mm height</p>	<p>Classical industrial saw mill 90 Band saw max 650mm cutting thickness</p>	<p>CNC model large Industrial band saw line for bulk long and big log cutting max cutting diameter up to 1300mm length max 9000mm</p>
