

High efficiency/Low Consumption

硬度高的45#国标碳钢，通过十道工序精准加工成800mm直径42mm厚的锯轮，外圆弧面设计锯条稳定性好不易跑锯、断条、锯切精准、耐磨。

Use 45# high hardness carbon steel and go Through Ten steps (laser cutting, heat treatment etc)Process.800mm diameter and 42mm thickness. more stable and more durable. Saw blade is not easy to broken, reduce the Cost of saw blade.

使用台湾品牌ABBA精密丝杆,以2米/分的升降速度，可在300MM内任意设定升降高度，定位精准，锯切稳定。

Use ABBA(TAIWAN brand)high precision lead screw.can adjust the lifting within 300mm. Easy adjust the cutting thickness and high precision location.

「智能」 Intelligent

蜗轮减速机，智能定位更精准，减少误差。

Worm gear reducer, intelligent positioning more accurate, reduce errors.

「高配置恒温液压系统」

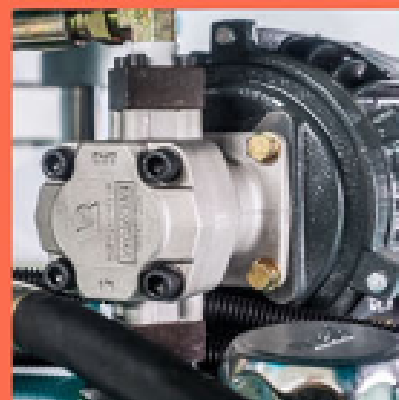

High Configuration Constant Temperature Hydraulic System

美国进口阀
American Import Valve

中意合资液压马达
HYDRAULIC MOTOR

台湾齿轮泵
TAIWAN GEAR PUMP

油温稳定、输送平稳流畅，独创齿轮减速设计，
锯切宽板减速加大扭力减少振动，锯切更精准平滑。
Stable oil temp, feeding fluency, creative wheel gear slow down design.
Cutting the width wood board can slow down and increase the

操作面板 operation panel
