

YOUR NEXT GENERATION
AXTRA CNC PANEL SAW
SMOOTH CUT, NATURALLY HIGH PRECISION

T45 CNC RIP FENCE SLIDING TABLE SAW

Axtra T45 sliding table saw is industrial professional saw for various panel cutting, solid wood cutting, ripping angle cutting, grooving, max 3200mm length sliding table, max 120mm cutting thickness, with professional scoring blade meets all your requirements with a sliding table saw.

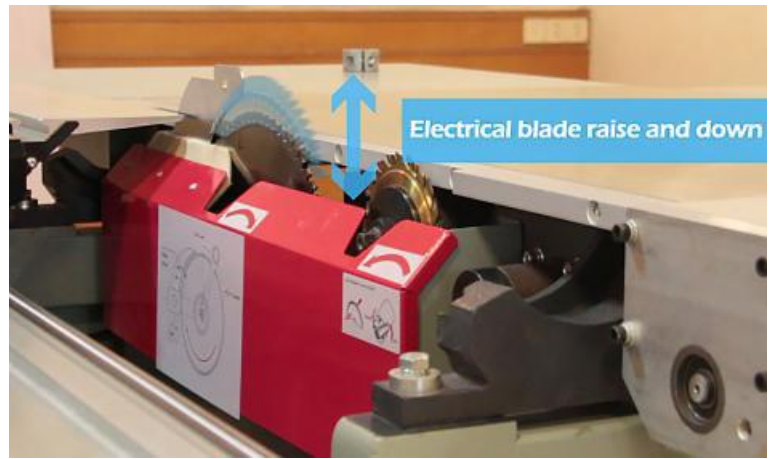

CNC rip fence give a super precise and easy setting completely solve the error caused by manual setting, greatly increase efficiency of work. Very safe European saw blade cover give a very clean working condition and greatly reduce the accident of user injury. Electrical blade raise and down makes working extremely smooth and easy while the sliding table any position lock system reflects it is a professional panel saw. Scoring blade can be lower and hidden for solid wood cutting or grooving work avoid tedious blade take off work.

Heavy machine structure and saw unit, makes it a life long precision saw which gives you a feeling of smooth, quiet and flexible to use.

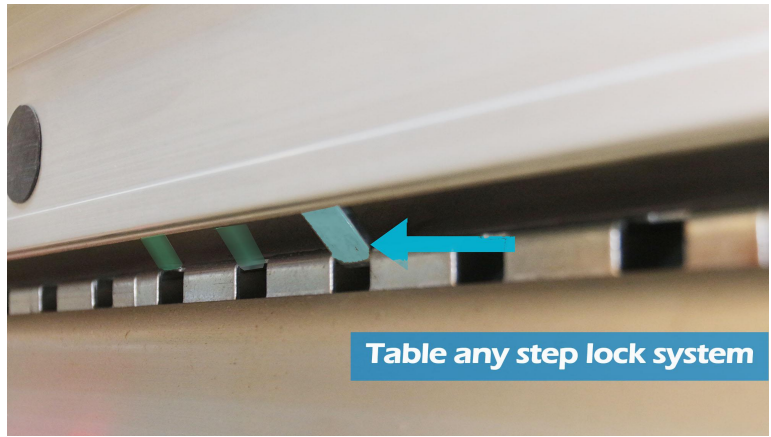

Electrical tilting function can be achieved by a natural Standing control, the motor will stop automatically when the blade reached 45 or 90 degree limit

Electrical blade raise and down makes it very quick set when we cut different material thickness, blade better keep a nearly same and little higher than material.

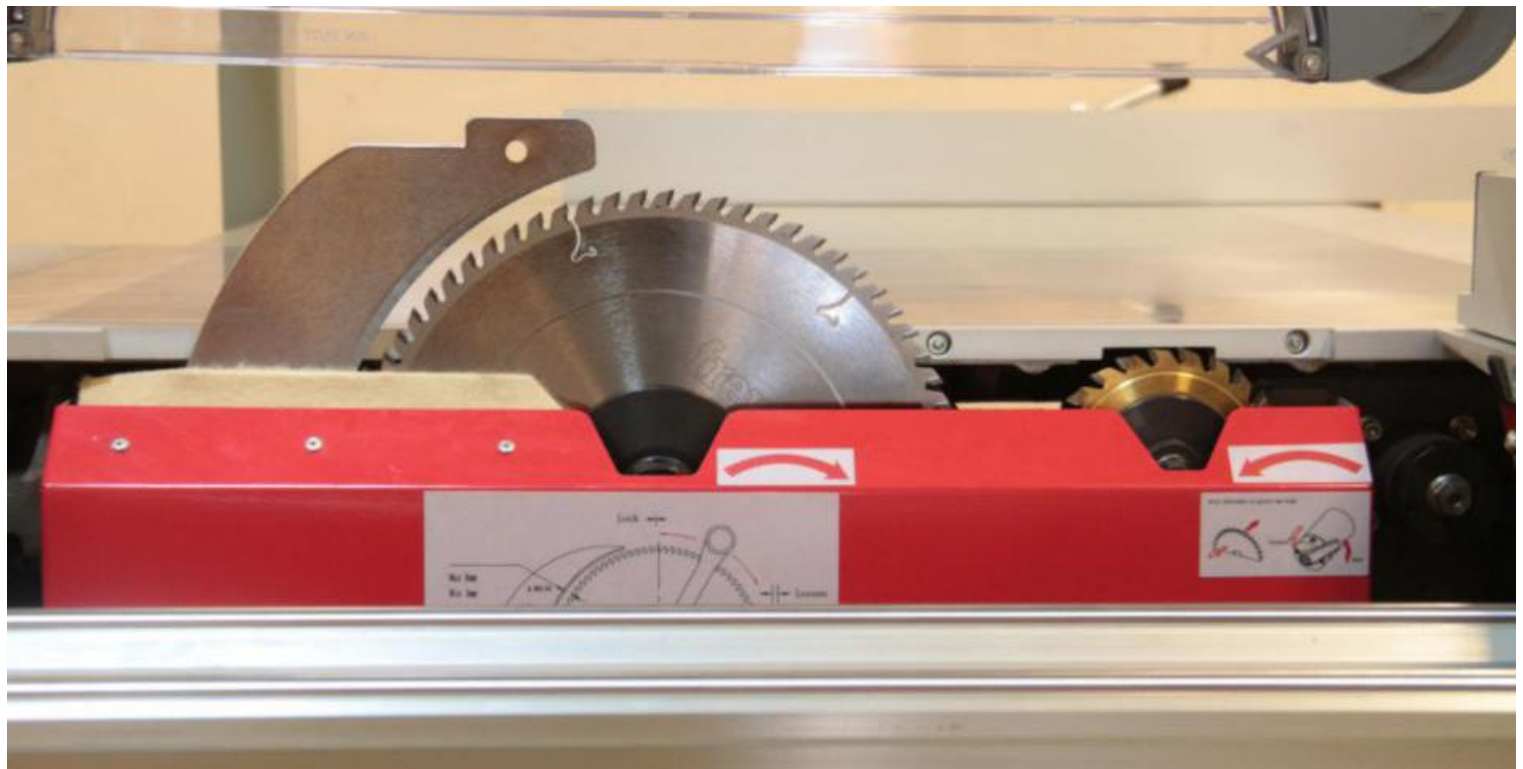

When use tilting function, there is even LCD indication of tilting degree number which is very user friendly Function

Sliding table any position lock system makes table stop at any position you want, this is very useful function on real using condition if you want to change blade

If you want a High precision smooth straight cutting, 45 degree jointing, or clear grooving or any other function like solid wood ripping, cross cutting etc, SAGA T45 is your wise choice to get a immediate perfect finish.

PARAMETERS

Sliding table length	3200mm/3000/2800/1600
Max cutting thickness	125mm
Blade raise and down	Electrical 0-125mm
Blade tilting	Electrical 45-90 degree
Ripping fence	CNC combine manual
Control panel	Touching screen
Main saw spindle	30mm diameter
Main saw power	6.5kW
Main saw running speed	4000/5000r/min
Main saw max blade size	400mm
Scoring saw running speed	8200r/min
Scoring saw spindle	20mm diameter
Scoring saw power	1.1kW
Net weight of machine	900kgs
Standard fitting	European standard dust collection cover
Optional	Pneumatic material clamping
