

Manual is a thing of past

Welcome the era of auto precision

MBZ600 automatic planer

If there is a standards for a ultimate smooth precision planing, Axtra MBZ600 may meets and it also may be the best planer among the Industrial heavy duty grade in the world.

With super precision magnetic scale set at front control panel automatically, forever say bye to tedious manual setting and error for thickness due to the manual reading of measure scale, and gives a very precise thickness reference of later machining work, especially for CNC machining which emphasis on precision more. Heavy duty structure makes machine run so stable and quiet, helical spiral cutters is born for a super smooth planing, hard chrome feeding table make feeding so smooth that you may never experience on a traditional planer also it makes your machine table life-long unti-rust.

Speed variable adjustment is a standard fitting on every high class planer, and sure with MBZ600, with feeding speed from 6-18m/min.

MBZ600, may meets all your expectation about a high performance planer, and you are welcomed to experience a high smooth soft planing finish.

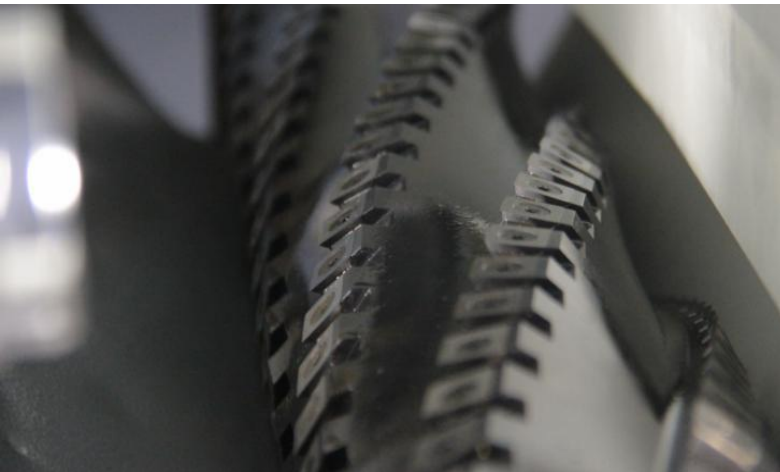

HIGHLIGHTS OF MBZ600

Automatic magnetic scale thickness setting, with speed converting

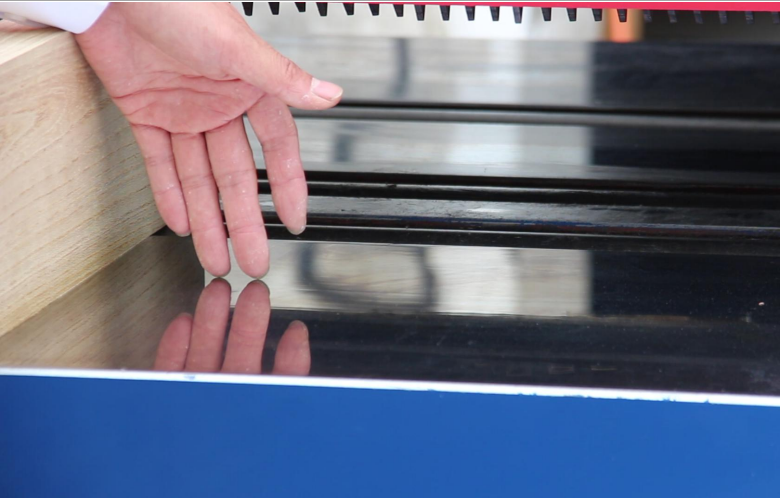

Solid cast iron structure is reflection of a industrial heavy duty planer

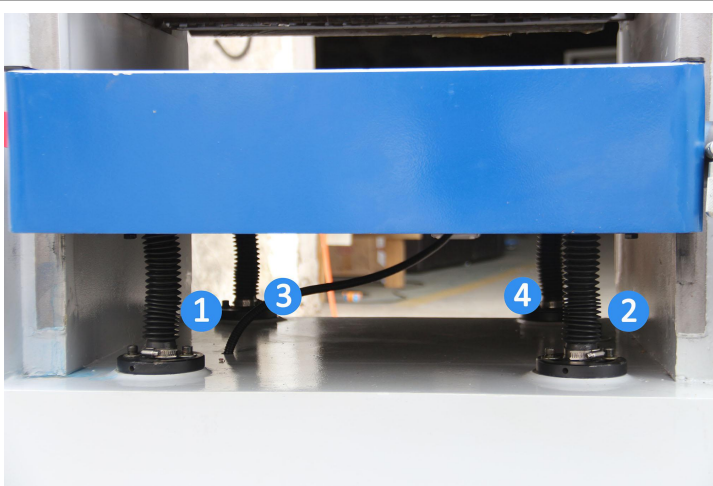

Axtra Silent running helical spiral cutters enable a very powerful planing with quiet running

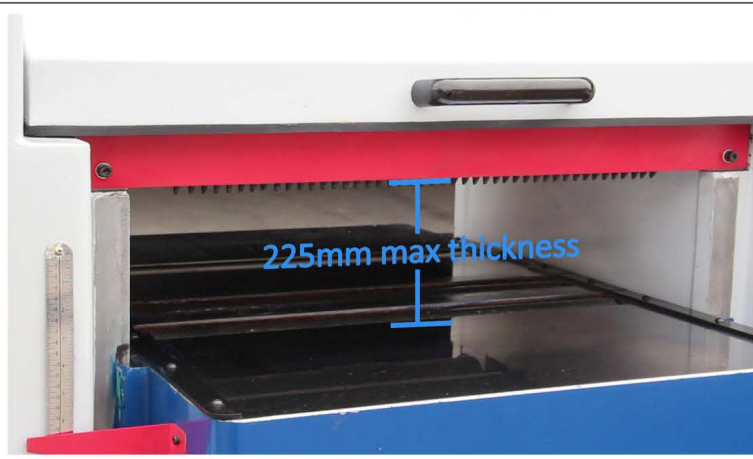

Heavy duty Feeding system with 2 pcs self thickness matching roller and 2 outlet roller and anti jumping system for a super stable feeding

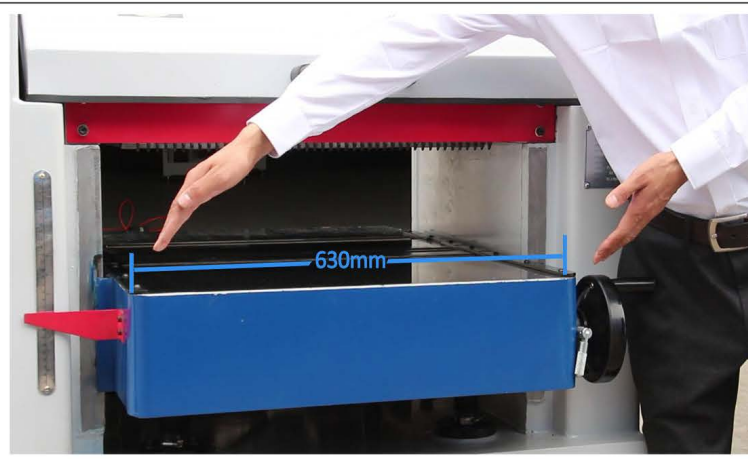

Hard chrome treated feeding table to a mirror effect to ensure a super smooth feeding and anti rust life long

4 cylinder poles gives very stable support of feeding table

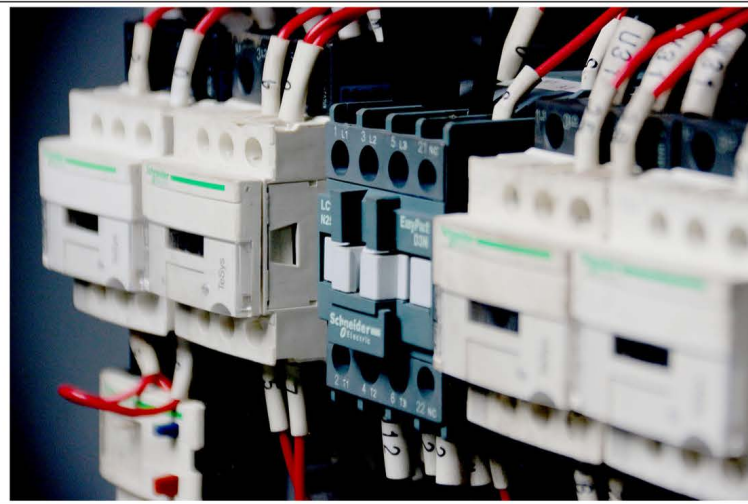

225mm max planing thickness

630mm big planing width

Emergency stop button even at back of machine for ultimate safe

European electrical wiring

BIG WIDTH PLANING

Big width planing is really a challenge for a thickness planer

Not only big power but also a powerful smooth feeding is required

MBZ600 is born for challenge

ART FOR WOOD PLANING...
MBZ600 MAY BE YOUR ULTIMATE DESIRED FOR A PLANER

PARAMETER

Max planing width	630mm
Max planing thickness	225mm
Min planing thickness	5mm
Min planing length	220mm
Max planing amount	8mm
Feeding speed	6-18m/min
Power of planing	11kW
Running speed of cutter	5000r/min
Feeding rollers	2pcs sharpen teeth with self thickness match
Outlet rollers	2pcs smooth
Cylinder pole	4pcs
Dust collection	2pcs of 110mm
Weigh of machine	1050kgs
