

Disclaimer

We do our best to make sure each model is the best quality and inspect each item. Due to the nature of 3d printing, items may have minor flaws or imperfections. This is a normal part of the 3d printing process.

Articulated models are **FRAGILE** and should be handled with care. All 3D printed products are unsuitable for very young children as the articulated pieces may break off and become a potential choking hazard. Always supervise children when using this product. While these models will hold up to normal handling, we cannot be responsible for breakage caused by mishandling, dropping, pockets, purses, backpacks, etc.

All 3D models are printed with a high-quality PLA filament. PLA plastic or polylactic acid is a vegetable-based plastic material, which commonly uses cornstarch as a raw material. PLA is a fully biodegradable thermoplastic polymer consisting of renewable raw materials.

Shiny/Silk PLA Filaments are more fragile than other PLA Filaments.

3D printed objects are **NOT** dishwasher safe and should not be exposed to extreme conditions.
