Revised June 1st, 2018

2018 Price List - For Economical Customer Prepared Services:

*Gunsmith or owner may save money if they are capable of completely disassembling the firearm and properly performing the metal preparations including removal of old finish, rust, pits, dings, and dents. For better results, polish or buff all "external" metal surfaces prior to performing any bead blasting to break the oxidation on the metal surface. Do not just bead blast unpolished surfaces. Remove all grease-based buffing compound prior to shipping to Craftguard. Protect the freshly polished firearm parts with gun oil or Brownell's "Hold". Place the parts in plastic bag and wrap large pieces, such as a barreled action, in elastic-wrap. Package components in a sturdy box, making sure there is no rattle and mail to Craftguard. Upon package arrival, Craftguard will degrease and apply appropriate finish as requested by customer. On economical customer prepared services, Craftguard will NOT polish or further prepare metal surfaces. **Minimum order fee is \$50.00.** Prices subject to change without notice. **Prices DO NOT include return postage, insurance or sales tax (if applicable).** Electroless nickel finish may require fitting. Cerakote® and DuraCoat® may also require fitting due to build-up; depending on the gun's tolerances.*
