

PLASTICS

ACTIVE

The Active plastic is the base level plastic in our Active line. This affordable solid plastic blend offers a great grip and wears gradually.

ACTIVE SOFT

Softer version of our Active plastic is a great choice for colder and more wet conditions due to its fantastic grip. Active Soft discs are also slightly more durable.

ACTIVE PREMIUM

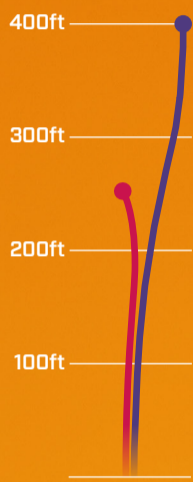

This premium plastic blend is translucent and highly durable. Active Premium discs are commonly notably more overstable than their Active plastic counterparts.

ACTIVE PREMIUM GLOW

The glow version of Active Premium plastic adds glowing properties to the disc, making it a great option for dark weather.
