

# EVOLUTION

## PLASTICS

### EXO

Standard base plastic available in two different flexes on standard releases: soft and hard. The Exo plastic offers a great grip and wears gradually.

### GEO

A plastic similar to the D-line plastic in our Originals line. Affordable, easy to throw, and able to handle moderate wear and tear on the course.

### NEO

Semi-translucent, premium plastic. Not only great looking, but also the most durable and rigid Evolution line plastic! It also offers an awesome grip.

### SPECIAL

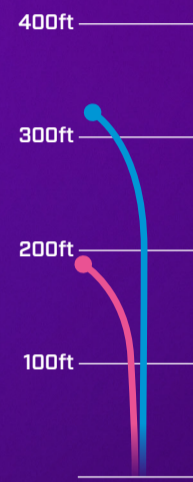

Vapor color bursts, metal flakes and color shifting plastics can be found in our Evolution line's Signature Series discs and other Special Edition releases.
