 ORIGINALS

**PLASTICS**

**D-LINE**

A more affordable and less durable option, the D-line plastic. It offers great grip and will usually last around one season. Available in different flexes, from soft to stiff.

**C-LINE**

Known for its beautiful see-through look, C-line is our most durable plastic. It's a premium quality plastic that retains its original flight characteristics for a long time.

**S-LINE**

A 5-star plastic blend, the S-line, offers excellent grip in all conditions and is extremely durable. Solid bright colors make this a real treat to the eye.

**SPECIAL**

Swirly colors, glittering metal flakes and a horizon rim, our Signature Series discs and other Special Edition releases feature a wide variety of special plastics.
