Apeos™

Hello to the future of work

The "Apeos" series offers advanced features with high security level and easy operability to help business diversify with times.
Quick and simple operability

High performance for greater work efficiency

Safeguard important information

Initiatives for environmental consideration

Accelerate your world of remort style

Quick and simple operability

Simple layout with easy navigation

Black and gray tone UI gives better contrast for easy recognition

- Icons are evenly spread for easy recognition
- Consistent operation steps of each function for easy recall
- Home screen personalization for ease of access to commonly used functions
- Pin regular settings for registering frequent or repeated jobs
- Clear visible light notifications for completed or error jobs
- Subtle sound notification for alert and attention

Light notification reminder

Light notification reminds user of uncollected original or printed document on the trays.

- Prevents uncollected documents left on the Center Tray or feeder
- Center Tray light further notifies when a fax is received on the Side Tray

Accelerated operations with no wait time

Quick startup and output for greater efficiency

- Quick warm up in less than 24 seconds
- Fast Boot Mode prepares the operation panel in 6 seconds[1]
- First Copy Output Time in 3.3 seconds[2]

[1]: Depending on the status of the main unit and configuration of options, it may not operate or take more than 6 seconds.
[2]: A4 LEF for C7070/C6570 when in horizontal/Monochrome preferred mode

Flexibility in office layout

Supports wireless LAN environment[1].

- Supports free addressing in the office with Wi-Fi support
- Up to five Wi-Fi Direct multifunction devices can be connected at the same time
- Supports direct mobile printing[2]
- Print Utility, AirPrint, and Mopria® Print Service are supported

[1]: Optional.
[2]: When connecting to Wi-Fi Direct.

Trays open and close lightly and quietly

Paper trays are equipped with a retraction mechanism for smooth opening and closing

- One soft push for closing
- Retracts softly and gently
- Drawing out is effortless

Smartphone becomes a "portable operation panel"

Seamless connectivity with mobile devices for Copy, Fax, Print, Scan[2] jobs using the Print Utility[1] application.

- Mobile device can be used as an alternative UI for operations control to minimise common touch points
- Frequent settings can be saved as "Favourites"
- Directly send fax or email with the addresses stored in the smartphone
- Minimise printer touch points for hygiene reasons

Note: Connect to machine via wireless environment or Wi-Fi direct connection.
[1]: It can be downloaded free of charge from Google Play™ or App Store.
[2]: E-mail, Scan to Folder.

High performance for greater work efficiency

Quick scanning of high-volume originals

Up to 270ppm* can be read at high speed in Copy or Scan. The post-processing jobs can be carried out without delay.
- Equipped with multifeed detection
- One pass DADF will not damage the original document
- The document cover closes slowly

* For Duplex Automatic Document Feeder C2-PC.
 During 1 pass and 2 sided scanning, 200 dpi to Folder.

Scan small originals such as checks and invoices together

Custom-size or small-size documents such as receipts can be scanned directly from the Duplex Automatic Document Feeder which can be automatically set into the nearest standard size.

- Instantly scan without manual entry of each original size
- Automatically converts custom-size originals to standard size
- Smart OCR function reduces post-processing work

Automatically scans small originals as-is to a standard size

B5 Size   A4 Size

Enhance sales capabilities by utilising business card information

With Duplex Automatic Document Feeder B2-PC, you can load originals that are as small as business cards.

- Supports minimum size of 49mm(W) x 85mm(L)*
- Multilple sheets of original can be loaded and scanned together

- 1-pass 2-sided DADF allows simultaneous front and back side scanning
- OCR feature reduces workload of manual data entry

* Applicable for paper weight 38 to 209 gsm

Various features saving time and effort in scanning operation

Scanned data can be transferred through a variety of methods including Email, URL, and send to PC (SMB/ FTP/SFTP).

- Data can be sent by using multiple features simultaneously
- Improve your digitalisation process with features including automatic orientation of scanned page to upright position, correcting the skewed page, or removing blank pages
- In addition to TIFF and JPEG, the scanned data can be converted to PDF with searchable OCR enabled

Create appealing promotional materials from various type of paper size and material

The device supports various paper size and thickness such as postcards, envelopes, and long paper.Promotional materials can be easily produced in-house

- Supports long paper up to 320 × 1,200 mm
- Supports 52 to 300 gsm paper from lightweight cardstock paper such as certificate of commendation
- Bypass tray supports postcards and envelopes

Safeguard important information

Information is an important asset which should be protected at all cost

Protect from unauthorised user

Multiple options of setting user authorisation allow administrator to select a right combination as per given environment.

• Local Authentication
• Authentication by Remote Server
• IC Card Authentication*
• User-specific feature access
• Private Charge Print

  * Optional.

Additional layer of unwanted access can be created for specific users. (e.g. guests).

• Secondary Ethernet Kit*

  * Optional.

Protects Data

Protects against any malicious intent of hacking, tampering with device / system settings.

• Encryption of stored data
• Uses TPM* 2.0 chip for encryption key management
• Deletes settings and document information all at once

  * Trusted Platform Module

Protects the information by means of strong encryption while transferring it between devices, servers etc.

• Encryption of communication paths by SSL/TLS or IPsec
• Encryption when transferring via SMBv3 and SFTP
• Scan file encryption/signature
• Email encryption and signature by S/MIME
• TLS version limit
• Elliptic curve cryptography
• WPA3

Protect from unauthorised access

Protects device settings at multiple levels by clearly demarking change restrictions for different target audience - End users, IT administrators and Service Engineers.

• Service representative operation restriction
• Account lock to prevent unauthorised access
• Information for changing the default password
• Warnings displayed when using global IP address

Prevents unauthorised program from installing without notice. Robust IT audits are supported with device data logs for easy tracking.

• Software signature verification
• Remote update restrictions
• IP address filtering
• Tampering detection at startup and automatic restoration when tampering is detected
• Prevention of tampering during operation
• Audit log
• Audit log system transfer

Prevents operation errors

Prevents information leakage due to inadvertent mistakes by administrators and users.

• Scan documents to be delivered to fixed destination
• Re-enter fax recipient
• Annotations
• Watermark

Initiatives for environmental consideration

We are working to develop environmentally conscious products, including technologies that reduce the power consumption of multifunction devices and printers to achieve lower environmental impact.
Fujifilm Group introduced the certification program in which we clarify the environmental value of each product by assessments at the time of product development, conduct the evaluation based on our in-house certification criteria and certify the products* that are excellent in reducing environmental impact as "Green Value Products". This product was certificated as a "Gold" rank product that contributes to reduction of environmental impact at industries' highest level.

* Products and services excellent in reducing environmental impact are those designed in consideration of environmental impact throughout their life cycle from acquisition of raw materials, production, usage, disposition, to reuse.

Initiatives for energy conservation

• Achieve both energy conservation and customer convenience by adopting IH fusing technologies that enable quick heating to eliminate the necessity of preheating in standby or power-saving mode
• Achieve both high image quality and energy conservation by equipping the LED printhead that enables space and energy saving design, as well as Super EA-Eco toner that has low-temperature fusing performance

• Reduce the power consumption with the smart power saving feature that solely powers on the required parts according to the functions being used by customers

Initiatives for resources conservation

• Functions contributing to paper consumption reduction
  – Private Charge Print, Scan, Paperless Fax, Pages per Side/ Multiple-Up etc.
