What Makes PIEA's AP Course Prep Unique?

- ✓ College Board-aligned curriculum
- ✓ Covers over 65% of the AP content before school starts
- ✓ Comprehensive instruction across all question types
- ✓ Abundant practice resources and expert support

Why Prepare Early?

The AP curriculum at any school is aligned to the College Board's AP Central. But not every teacher teaches the AP curriculum in the same way. Students who enter the school year already familiar with the content gain a significant advantage—they can focus on mastering tests and assignments while peers are still learning the basics.

That's exactly what PIEA's **AP Course Prep** offers—early mastery of the curriculum, less academic stress, and a competitive edge.

In the spring, PIEA offers **AP Test Prep** courses designed to help students achieve top scores on the official AP exams in May.
