

## **ETHER**

- Dr. PanneerSelvan  
B.Sc., BHMS, PGDACP

Consulting Homeopath and Accupuncturist

Ether is space.

Humans - and everything that has 'life' - has an etheric body which looks identical to the physical body but functions at a higher frequency. In fact, it is at the same frequency as the ether. Could this be where it derives its name? Scientists know that we are electromagnetic in origin.

Most advanced medical tests assess electrical impulses in the brain and elsewhere in the body to find areas of activity or lack of it that may be causing a problem. Our thoughts register activity in the brain. This activity can be seen with modern medical equipment but not the 'thought' itself. The thought operates at an even higher frequency but it is quite real.

The thought registers in the ether. Because Mankind has been denied Spiritual knowledge for so long, this sixth sense has become under developed and under used by most people. However, don't worry, there is no chance of it 'falling of.' I say most people because some do develop this awareness. These are people who learn and then train how to tune in to this higher vibration by the use of meditation, or other mental protocols, and travel through the ether to spy on each other and on selected targets. In this environment our selves are ether. If we want to go to the planet Mars, we simply think it and it happens.

Think Mars 1 and arrive on Mars 2. The distance doesn't matter. All this happens because we are in the ether and are part of it... all the same substance. Each 'molecule' of ether receives the information from the individual bodily intelligence as to what it will be at any given time. Cells, as we know, can create and change substance at will, and it

Subharati Niriksha Foundation

is this will...this intelligence...that travels through the ether giving the illusion of movement.

Physical mass does not move, only the information of the swirling mass of atoms that make it what it is.

Thought and life itself in the spiritual realms transcend these limitations for we then become part of the ether, part of this supreme intelligence that knows all. And if we want to go to the planet Mars, we just think the intention and step out the reaction, however many million miles away.
