

## **Mind Matter and Cosmos**

- Dr. Kirthi V Kakade  
BHMS, MSCP

For all that matters to our mind and the mind with its mysterious matter, from the mighty neurons its nano-anatomy , physiology and psycho-neuro- biology it all ends up with the dynamics with limited understanding in” How, When ,Where and What” upon which the whole basis of science thrives on. Bringing the topic to its end point of the unknown factors... !!

Now, how well is our mind equipped to dig deep within these so called unknown factors..are we rotating the upon the axis of facts waiting to be explained by science with its theories and hypothesis...?

From the ruins of Mexican pyramids to the mighty pyramids.. from the ancient vastu and astrology to the stone henge... their existence have spoken aloud about unspoken truths and connections to the astral life forms...which, today have been laid to rest..

Human body acting dynamically as a micro cosmos in itself of the entire universe accelerates the changes in the unlimited skies of space connecting each cell in every living being to the other for its similarities in composition and functions with the mighty cosmos.. Man however holds the superior hand in its evolution in the Central Nervous System (CNS), Autonomic Nervous System (ANS), Limbic System, The Hypothalamus , Pontine, SubstantiaNigra and many other parts of mid brain which are yet to be classified and defined for it various functions... notify the partial understanding of time (Viz the mind) nervous system (Viz Matter) and the similarity between the human body and the cosmic constituents into channelizing these facts from myths.. to illuminating upon the unseen but felt... experienced but not heard, perceived but not taught....

Man as a spiritual being has primed ourselves to see what has been shown, to follow and not lead , to substantialize than dynamism... to deny than to actualize...

The truth but holds good to any part of the universe to any number of life forms apart from milky way that a sleek thread is connected within each individual which explains our purpose of existence away from maya( Goddess of Deception) into the infinite illuminated endless circle of the ultimate ( can be denoted as a black hole in the universe) which absolves everything into nothingness.. and nothingness into mysterious cosmos .. cosmos into a human and human back to cosmos... !!!
