# Welcome to ROBO-G

ROBO-G, a robotics learning solution company was founded in 2015 to bridge the gap between the traditional approach of classroom coaching and learning to attain a deeper understanding of subjects in children.

The curriculum focuses on STEM education (Science, Technology, Engineering, and Maths) while delivering robotics knowledge. Children are motivated and encouraged to become learners by observing and working in teams. We try to ignite their minds by actively engaging all their senses simultaneously.

ROBO-G programs help children step into the world of Coding and Robotics technology at an early age.

## 1. LEGO Early Robotics

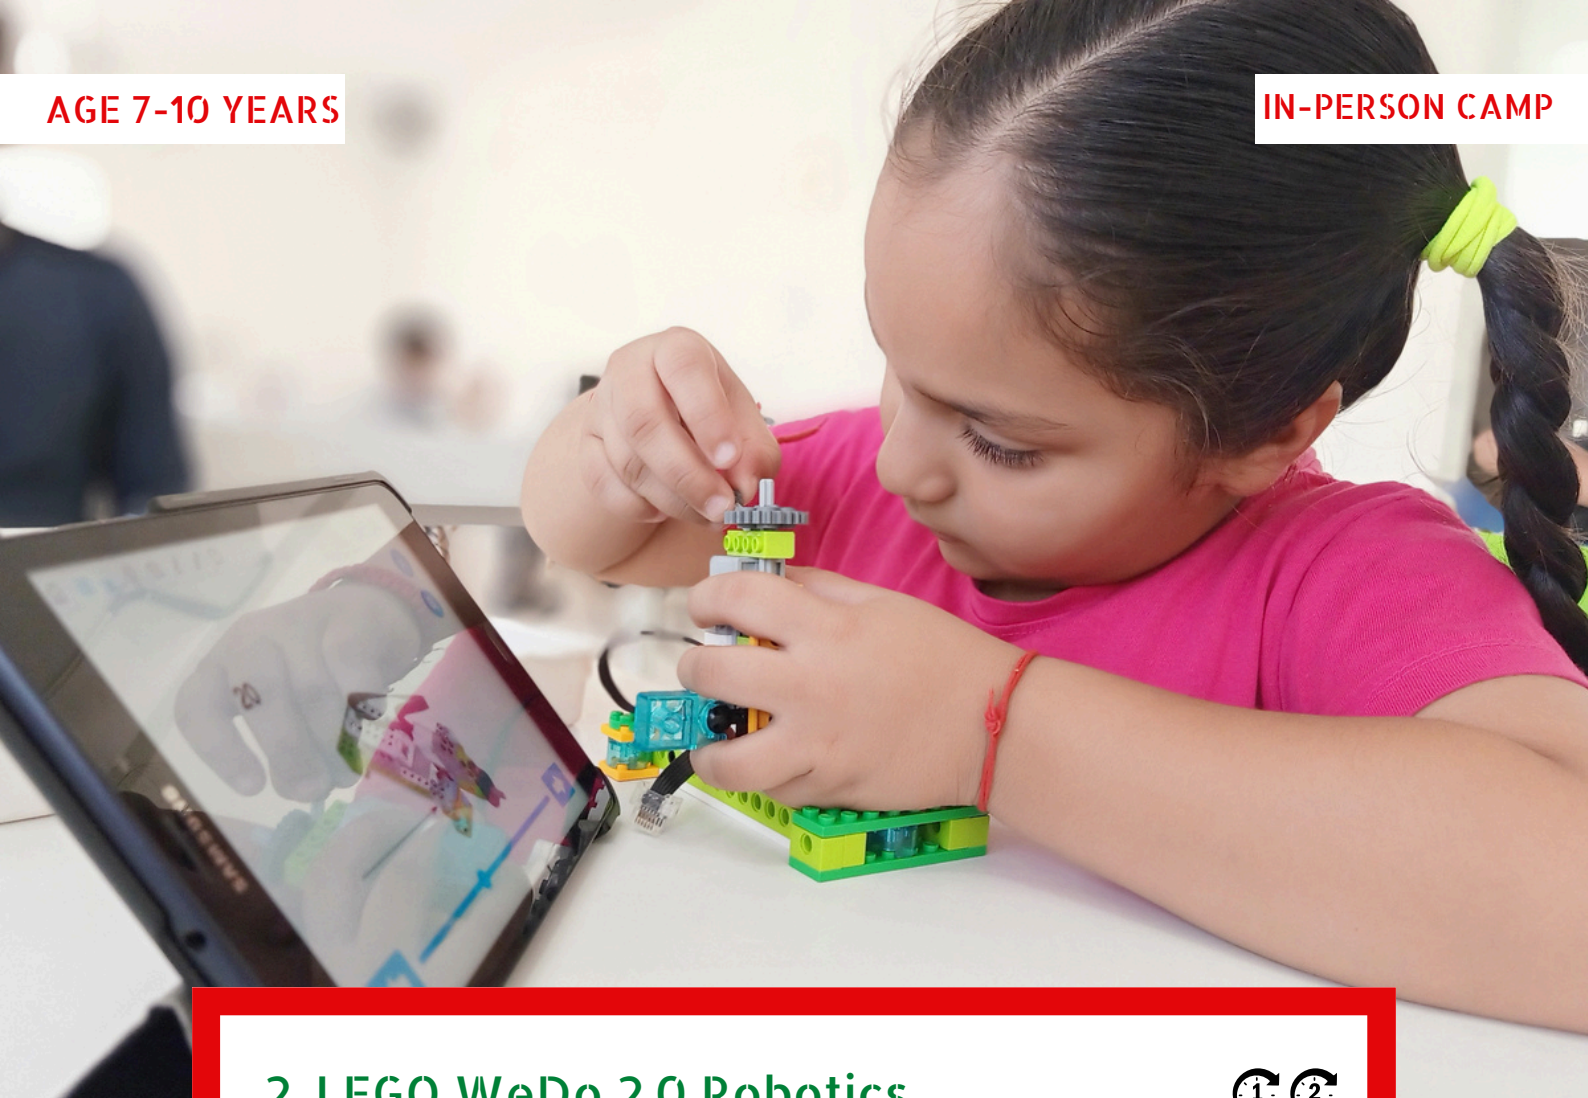

Children will be equipped with STEM knowledge & skills

This course enables students to work as young scientists, engineers, mathematicians, and creative writers providing them with the settings, tools, and tasks for completing cross-curricular projects.

Using these materials, students are encouraged to build and program a working model and then use the model for different purposes, depending upon the theme of the activity and its focused subject matter in science, technology, mathematics, or language.

## 2. LEGO WeDo 2.0 Robotics

### Make Science and Computing Come to Life

This course engage and motivates student's interest in learning science- and engineering-related subjects. It supports a hands-on, "minds on" learning solution that gives students the confidence to ask questions and the tools to find the answers and to solve real-life problems. It does not tell students everything they need to know. instead, it makes them question what they know and explore what they do not yet understand.

### 3. LEGO Mindstorms Robotics

Children will be equipped with robotics knowledge & skills

This hands-on, interactive approach to robotics immerses students in a real-world challenge. Students will master the fundamentals of robotics, including movement, turning, and working with sensors like ultrasonic, light, color, and gyro. Using LEGO® MINDSTORMS® Robot, they will build and program robots to complete exciting challenges, just like real scientists and engineers. Along the way, they'll develop critical problem-solving skills, creativity, and innovation—making STEM learning truly come to life!

- Total no. of sessions: 10
- Each session: **2 Hour**
- Timings: 11 AM - 1:15 PM, 3-5:15 PM
- Camp Dates: 20 - 30 December 2025
- **Holiday: 25 December 2025**
- Level: Beginners
- Certificate of completion will be provided
- Fees: INR 13,000 (inclusive of all)
