A total lunar eclipse takes place when the Earth comes between the Sun and the Moon and covers the Moon with its shadow. When this happens, the Moon can turn red, earning it the nickname of Blood Moon. Paired Together

Total eclipses of the Moon happen at Full Moon when the Sun, Earth, and Moon are aligned to form a line. The astronomical term for this type of

alignment is syzygy, which comes from the Greek word for being paired together.

Earth Blocks the Sunlight

The Moon does not have its own light but shines because its surface reflects the Sun's rays. During a total lunar eclipse, the Earth comes between the Sun and the Moon and blocks any direct sunlight from reaching the Moon. The Sun casts the Earth's shadow on the Moon's surface.

Types of Eclipses

Earth's Three Shadows

Earth's shadow can be divided into three parts:

- Umbra - the darker, central part.
- Penumbra - the outer part.
- Antumbra - the partly shaded area beyond the umbra.

Why are there three shadows?

During a total lunar eclipse, Earth's umbra completely covers the Moon.

Sun, Earth, and Moon Aligned For a lunar eclipse to occur, the Sun, Earth, and Moon must be roughly aligned in a line. Otherwise, the Earth cannot cast a shadow on the Moon's surface and an eclipse cannot take place. When the Sun, Earth, and Moon come together in a straight line, a total lunar eclipse takes place. When the three bodies are aligned in a way that the Moon is partly covered by the Earth's umbra, a partial lunar eclipse is the result. On the other hand, if only the outer part of Earth's shadow covers the Moon, a penumbral lunar eclipse takes place. Earth's umbra extends into space far beyond the orbit of the moon. This means that Earth's antumbra plays no role in lunar eclipses.

The Science of Total Solar Eclipses

The Sun, Moon, and Earth are aligned. Only viewers located in the path of the Moon's full shadow, its umbra, can see a total solar eclipse. The Moon's umbra travels eastward at about 1,700 km/h (1,056 mph).

A total solar eclipse can last for several hours. Totality can range from a few seconds to 7.5 minutes. The longest total solar eclipse of the 21st century took place on July 22, 2009 when the totality lasted 6 minutes and 39 seconds. On average, there's approximately one total solar eclipse every 18 months, when:

- It is New Moon.
- At the same time, the Moon is at (or very near) a lunar node, so the Earth, the Moon, and the Sun are aligned in a straight (or nearly straight) line.
- The Moon is near perigee.

Moodami means the darkness in Sanskrit.

When the grahas (Planets) Brihaspati or Guru (Jupiter) and Shukra (Venus) near the Sun (Surya), the Moodami occurs. The planet which nears the Sun loses its energy and power. The darkness occurs in the time of planetary motion.

SAI SANCHARA SEVA

Host Saibaba to Your Home

na guror adhikam tattvam | na guror adhikam tapaḥ ||
tattva jñānāt param nāsti | tasamai śrī gurave namaḥ ||

Shirdi Sai Baba Temple of San Deigo is organizing a "Sai Sanchara Seva event". As a part of this seva, Baba & the Padukas shall be brought to the devotee's homes, thus giving them an opportunity to do Puja & Worship Baba's padukas in their respective homes.

The main goal of this Seva is to bring people together for a common cause of service in order to bring the devotees one step closer to Sai Baba, as the saying goes, "Service is Baba and Baba means Service".

Sai Seva Priest will come along with Saibaba Idol, & the Padukas to your home will guide you to do Samoohika Abhishekam, Archana, Sai Bhajans & Sakaala Aarti

Our Organization – Vaidika Dharma Sabha's - goal is to guide and teach everyone to perform there Nitya Karma (Daily Rituals), Samskara's, Reciting Vedic Mantra's with proper pronunciation ,Swaram and chanting Shlokas with Akshara Spashtam as per Hindu Shastras, and propagation of Sanatana Dharma in this material world.

We offer all Hindu Religious services according to your personal need and requirement at your preferred venue.

We perform all services in tradition & authentic way . We brief the meaning of the rituals (in English & some of the Indian language) why & when should we perform the ceremony in a specific manner.
