E- Mobility Solutions from YELLOME Green Energy

Sammagra Energiea solutions private limited is a Bangalore based manufacturing company. We are manufacturing solar products and accessories. Along with that we also manufacture LED lights which one is using for architect lighting.

We also manufacture the solar off grid inverter with in build Lithium Phosphate battery (LiFePo4) to avoid the pollutions caused by normal Lead Acid Batteries. We offer innovative technologies in the field of renewable energy which helps our country to reduce the pollutions. We create new thoughts in the field of renewable energy and apply engineering skills on it.

We approach each day as vital steps in building of renewable energy sector which we think that help our nation to grow. Our team is having a cumulative industrial experience of more than 25 years which starts form system design, Manufacturing, project management and after sale service.

Our engineering skills help us to produce cost effective product and services for the end customer. We do detail marketing analysis which helps us to increase our sales network.

Residential, Commercial & Industries

E-Vehicle Charging
Solutions

Charge your Electric vechile as fast as refueling Gas Cars...
INEGREV Range caters all the segment of charging...

Extreme fast charging changes perception of EV charging convenience

- Floor and wall mountable models, suitable for outdoor installation
- Single-phase units, up to 7.4 kW per socket
- Three-phase units, up to 22 kW per socket
- Simultaneous recharge
- Multiple sockets to choose from for each output:
 - type 2
 - cable type 1 (4m spiral)
 - cable type 2 (4m spiral)
 - domestic socket
- RGB LEDs , 4.3" TFT color screen, multi-language, MID wattmeters, RCD 30 mA Type A, C Curve MCB, USB, Ethernet (2 ports, switch function) and WiFi, Ground anchorage included, easy installation, Galvanized steel, IP54 / IK10

Application: 4W

RAPID 50

- DC Rapid charging point
 - **DC CHAdeMO 50 kW (Duo/Trio)**
 - **DC CCS 50 kW (Duo/Trio)**
 - **AC Cable Type 2 - 43 kW (Trio)**
- 7" color touch screen
- RFID
- IP55, IK10 (display and ventilation grid IK08)
- Ethernet
- OCPP & Smart Charge
- Options:
 - All connectors safety lock system
 - 3G

RAPID 50 Duo with 2
Charging Guns

RAPID 50 Trio with 3
Charging Guns

Application:

**Commercial Fleets
(Cars)**
