## ABOUT SAMMAGRA ENERGEIA

Sammagra Energeia Solutions is a private limited company located in bangalore, karnataka, India. We are manufactures of All solar products, Batteries, invertors, E V Charger and other renewable energy accessories

We offer innovative technologies in the field of renewable energy sector and create thought by applying engineering skills on it

While Bangalore is our home, we have made our name as a leading manufacturing and project management in renewable energy verticals. We approach each day as vital steps in building the future of renewable energy.

Our team includes members who excel in the field of renewable energy. The team is having a cumulative experience of around 27 years in renewable energy field starts from design, development, manufacturing, project management and operations and maintenance for renewable energy products.

Our engineering capabilities help us to design cost effective projects, which are backed by a through analysis of project location which includes solar radiation analysis, grid connection infrastructure and emerging technologies. Our project design considers various factors like geographical location analysis, temperature variation analysis, and climate condition analysis, details analysis of power generation and operation and maintenance requirements.

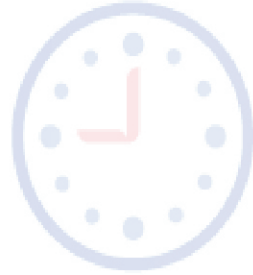

### SAMMAGRA'S MANUFACTURING IS ALWAYS IN PROGRESS
