Profile Inside back Cover

AMECA Certification - ECCO's Engineering Test Lab is certified by the Automotive Manufacturers Equipment Compliance Agency (AMECA) to perform testing on warning lights per the Society of Automotive Engineers (SAE) requirements. ECCO test reports are reviewed by AMECA and a Notice of Equipment Compliance is issued which is then noted here as AMECA certified.

NEW

Products In This Catalog

Welcome to ECCO's 2008 Product Guide, within this catalog you will find our full line of products displayed in what we hope you will find an easy to reference format. Of special significance in this guide is the exciting line up of new products available this year.

Beacons

See pages 3-7 & 14 for six new LED beacons included in this guide. Our 7100 Series – Reflex™ beacon features reflector technology, multiple flash patterns, synchronization capability and meets SAE Class I and California Title 13 requirements. The 7400 Series – Profile™ beacon also features a LED/Reflector design in a single flash pattern light that is highly compact yet offers SAE Class I light output. The 7600 Series – RotoLED™ beacon features a hybrid LED/Rotator design, offering the best of both worlds, as well as meeting SAE Class I. The new SAE Class II 7940 and 6460 Series industrial LED are additions to existing popular light series.

Minibars

Three LED additions to the minibar line are featured on pages 35, 38 & 39. The 5180 Series – Blaze® II is an addition to our highly popular low profile line while the all new 5280 Series - RotoLED™ features hybrid LED/Rotator technology. Both meet SAE Class I requirements. The 5000 Series adds another highly capable yet budget conscious LED minibar to our offering.

Directional Lights

On page 44 the new 3510 Series surface mount directional LED provides SAE Class I warning, premium functionality, and the power of 24 1-watt LEDs in a super slimline housing. See page 46-47 for two new additions to the 3700 Series product line, a California Title 13 approved, 3760 grommet mount model, and a smaller 3730 model. Both offer similar functionality to the original 3710, the 3760 meets SAE Class I while 3730 meets Class II. Further additions are the 9010, 9011, 9012, 9021 & 9031 Series – HIDE-A-LED™ concealed warning lights on pages 50 & 51 that eliminate the need for remote power supplies and offer multiple flash patterns and synchronization capability.

Camera Systems

ECCO's new Gemineye™ line of camera systems is featured on pages 74-83. Choose from 3 sizes of LCD monitor from 3.5" up to 7.0" widescreen, 5 camera styles including automatic shutter and eyeball models as well as controller and DVR options. Gemineye™ Camera Systems offer a configuration to suit any application.

Lighting Symbol Guide

LIGHT SOURCE SYMBOLS

LED Indicates LED (Light emitting diode) lights

LED HYBRID Indicates 360° LED/Rotator hybrid lights

STROBE Indicates gaseous discharge strobe lights (Xenon)

ROTATOR Indicates 360° rotating halogen lights

FLASHERS Indicates either incandescent or halogen solid state flashers

SAE CLASS METER

Class I Meets SAE Class I (All Class I lights meet SAE Class II & III)

Class II Meets SAE Class II (All Class II lights meet SAE Class III)

Class III Meets SAE Class III

NOTE: Where a symbol shows Class I and II, the product features self adjusting (Smart Strobe®) operation and the lower intensity mode meets Class II.

ECCO®'S LINE OF BEACONS

ECCO offers a beacon to suit any user application, on or off road, industrial or agricultural we have the product to suit your needs. Strobe, rotator, LED and incandescent versions are available with a variety of intensity, flash rate and mounting options to choose from.

Coated aluminum heat sink is specifically designed to efficiently dissipate heat from the LEDs throughout the entire beacon base.

Eight high intensity, 3-watt LEDs combined with unique reflectors provide powerful 360° SAE Class I light output.

- 5 wire connection allows easy flash pattern and hi/lo intensity selection and synchronization

Features

- Eight 3-watt LEDs and reflector technology produce a high intensity warning signal.
- Steady burn, Double (2), Quad, Quint, Pulse8, Rotating (3), Title 13 (3), and Cycle (3) flash patterns.
- Hi/lo intensity control.
- Multiple units can be synchronized.
- Die cast aluminum base is coated against corrosion and designed for vibration resistance and heat dissipation. Permanent mount models are sealed in epoxy for added protection.
- Warranty: 5 years
- Temperature Range: -22°F to +122°F (-30°C to +50°C)

Approvals

- SAE J845 Class I (except green)
- California Title 13 (except green)
- CE, e
- IP Rating 66 (3 bolt mount)

- 7160 Series SAE Class I LED

NEW

The 7160 Series - Reflex™ LED beacon provides the ultimate level of power, versatility and style available in an LED beacon. The latest high intensity LEDs combined with reflector technology produce a powerful, SAE Class I/Cal Title 13, warning signal in a light that also offers premium features including multiple flash patterns, hi/lo intensity control and synchronization capability. Low amp draw, zero maintenance and an extended life backed by a 5 year warranty make this light an obvious choice to replace strobe or rotating lights.

Replace X in part number with desired lens or LED color: A = amber, B = blue, C = clear, G = green, R = red

7460 Series - PROFILE™ SAE Class I LED

NEW

The compact and unobtrusive 7460 Series Profile™ LED Beacon incorporates a simple yet highly effective and robust design featuring an overhead heatsink that also allows removal of the flange when the unit is pipe mounted. The 7460 features a 'Pulse8' flash pattern that human vision is highly sensitive to in the periphery, increasing potential visibility where vehicle hazards are not in direct line of sight. A 5 year warranty and the usual maintenance free, low amp draw benefits of LED technology make this an ideal light for any application.

Features

- Eight 3-watt LEDs and a parabolic reflector produce attention getting SAE Class I light output.
- Human peripheral vision is highly sensitive to Pulse8 pattern that features 8 flashes per cycle (75FPM).
- Overhead heatsink design allows for unobtrusive pipe mounting with flange removed
- Warranty: 5 years
- Temperature Range: -22°F to +122°F (-30°C to +50°C)

Approvals

- SAE J845 Class I (except green)
- CE
- IP Rating 67

- Detachable flange design allows easy and unobtrusive pole mounting. Pole not included. See page 21.

Replace X in part number with desired lens or LED color: A = amber, B = blue, C = clear, G = green, R = red

Pulse8 Flash: 8 flashes per cycle (75FPM)

Features

- ▶ LED Hybrid technology provides a high intensity rotating warning signal with no gears, brushes or bulbs to wear out.
- ▶ Eight 3-watt LEDs combined with a TIR optic produce an exceptionally bright warning beam.
- ▶ Polycarbonate lens features a UV hard coating to greatly reduce cracking, hazing, abrasion and fading.
- ▶ 1" pipe mount flange accessory available (order separately A7660PF).
- ▶ Warranty: 5 years
- ▶ Temperature Range: -22°F to +122°F (-30°C to +50°C)

Approvals

- ▶ SAE J845 Class I (except B, CA, CG & G)
- ▶ CE, e
- ▶ IP Rating 67

ROTOLED™ - 7660 Series SAE Class I LED Hybrid

The 7660 Series RotoLED™ beacon combines all the major benefits of the latest LEDs with the unmistakable warning signal of a rotator, without compromising reliability. LED hybrid technology uses a brushless magnetic drive system to spin the reflector disk, reducing noise and eliminating the typical motor/gear drawbacks associated with conventional rotators. The 7660 also features eight 3-watt LEDs and a TIR optic to provide SAE Class I light output. Additional benefits include an extended, service free life, low amp draw and a 5 year warranty.

45° angled reflector driven by a quiet brushless magnetic drive system provides an exceptional warning beam without compromising reliability.

Eight high intensity, 3-watt LEDs combined with a unique TIR optic project light onto the reflector to provide SAE Class I light output.

Unique base design efficiently dissipates heat from the LEDs

Replace X in part number with desired lens or LED color:
A = amber, B = blue, C = clear, G = green, R = red

7960 Series - pulse®

SAE Class I LED

7960CX-VM

7960A

ECCO's 7960 Series LED Beacons feature 16 of the latest high intensity 3-watt LEDs providing SAE Class I light output. Double or quad flash operation and hi/lo intensity control combined with a long maintenance free service life and low amp draw make this beacon the perfect choice for both on and off-road applications. Easily replaces old rotating or strobe beacons with the latest technology so no ongoing maintenance is required.

Features

- ▶ Sixteen 3-watt LEDs provide unrivalled flash intensity
- ▶ Double or quad flash operation with hi/lo intensity control
- ▶ Die cast aluminum base is coated against corrosion. Permanent mount models are sealed in epoxy for added protection
- ▶ Thread-on polycarbonate lens allows easy flash mode selection without tools
- ▶ Reverse polarity, voltage spike and surge protected
- ▶ Warranty: 5 years
- ▶ Temperature Range: -22°F to +122°F (-30°C to +50°C)

Approvals

- ▶ AMECA certified to SAE J845 Class I (A & CR)
- ▶ CE, e
- ▶ IP Rating 56

7940CX-VM

7940A

ECCO's 7940 Series LED Beacons feature 8 of the latest high intensity 1-watt LEDs providing SAE Class II light output. Double or quad flash operation combined with a long maintenance free service life and low amp draw make this beacon a cost effective choice for many applications. Easily replaces old rotating or strobe beacons with the latest technology so no ongoing maintenance is required.

Features

- ▶ Eight 1-watt LEDs provide high intensity light output
- ▶ Double or quad flash operation
- ▶ Die cast aluminum base is coated against corrosion
- ▶ Thread-on polycarbonate lens allows easy flash mode selection without tools
- ▶ Reverse polarity, voltage spike and surge protected

6900 Series SAE Class I Strobe

Medium 6970A-VM

ECCO's 6900 Series strobes feature our patented i.beam® LED technology. i.beam® constantly monitors circuit board and flashtube performance on each flash cycle. If the lamp fails and the circuit board LED is still flashing the user immediately knows that only the flashtube needs replacing.

Smart Strobe® versions feature automatic adjustment for day/night operating intensity and double or quad flash rate is selectable at installation. Non-smart models operate constantly at the SAE Class I output level and feature double or quad flash modes (selectable during installation).

Features

- ▶ Die-cast aluminum base is coated against corrosion and designed for vibration resistance and heat dissipation.
- ▶ Thread-on polycarbonate lens and snap-fit flashtube allows easy field service without tools.
- ▶ Shock-resistant circuit board mounting incorporates 7 support points.
- ▶ Circuit board is conformal coated to prevent corrosion.
- ▶ Consistent operation during voltage and temperature changes.
- ▶ Reverse polarity, voltage spike and surge protected.
- ▶ Warranty: Strobe = 2 years / Flashtube = 6 months
- ▶ Temperature Range: -22°F to +122°F (-30°C to +50°C)

Approvals

- ▶ AMECA certified to SAE J1318 Class I (A & C)
- ▶ CE, e
- ▶ IP Rating 66

i.Beam® on-board LED diagnostic indicator constantly monitors circuit board and flashtube operation. LED illuminates on each flash cycle enabling easy flashtube fault detection.

Convenient snap-fit flashtube and screw on lenses means no tools are required for tube replacements.

Circuit board mounting incorporates 7 "pressure points" to combat vibration.

Smart Strobe® models automatically adjust light intensity for day or night time operation using an on-board photocell to sense ambient light on each flash cycle.

Replace X in part number with desired color: A = amber, B = blue, C = clear, G = green, R = red

6700 Series SAE Class II Strobe Severe Vibration Applications

Designed to meet all the harsh operational requirements of heavy mobile equipment. Both versions of the 6700 Series strobe are built to withstand the toughest applications, severe vibration, pressure washing and steam cleaning. Power supplies are completely encapsulated in epoxy resin and 6750/6770 versions feature ECCO's patented i.beam® flash technology to monitor circuit board and flashtube operation.

Features

- Circuit board is completely encapsulated in epoxy resin for protection against moisture, dust and vibration.
- Choice of base types: Powder coated aluminum or reinforced nylon.
- 6750 and 6770 models feature i.beam® LED diagnostic indicator.
- Thread-on polycarbonate lens and snap-fit flashtube allows easy field service without tools.
- Consistent operation during voltage and temperature changes.

6460 Series Low Intensity LED Industrial Applications

6460A-MG

ECCO's maintenance free 6460 Series LED Beacon features 30 ¼-watt LEDs and offers a choice of rotating or Pulse8 operation, producing a warning signal that is ideal for industrial type applications. The long, maintenance free service life of LED technology, backed by a 5 year warranty, make this a perfect replacement solution for existing strobe beacons. This cost effective light features a wide 12-80V operating range that also makes it perfect for use on electrically powered vehicles and equipment.

Features

- ▶ 30 ¼-watt LEDs.
- ▶ 12-80v Pulse8 or rotating operation.
- ▶ Reinforced nylon base and polycarbonate lens.
- ▶ Reverse polarity, voltage spike & surge protected.
- ▶ Warranty: 5 years
- ▶ Temperature Range: -22°F - +122°F (-30°C - +50°C)

Approvals

6400 Series Low Intensity Strobe Industrial Applications

Features

- Compact and economical low intensity strobe ideal for industrial applications.
- Rugged glass filled nylon base and polycarbonate lens.
- 6410 and 6410-MG models feature field replaceable snap-fit flashtube.
- Reverse polarity, voltage spike and surge protected.

6260 Series Low Intensity LED Industrial Applications

ECCO's maintenance free 6260 Series LED Beacons feature three of the latest 3-watt LEDs and Pulse8 flash operation (70FPM), producing a warning signal ideally suited to industrial applications. This cost effective unit has a wide operating range of 12-80V making it the perfect light for use on electric vehicles. The long, trouble free service life and low amp draw characteristics of LED technology make this an ideal replacement solution for rotating or strobe beacons.

Features

- Utilizes three 3-watt LEDs.
- 12-80V, Pulse8 flash operation (70FPM).
- Reinforced nylon base with epoxy sealed electronics provides superior environmental protection.
- Robust polycarbonate lens.
- Reverse polarity, voltage spike and surge protected.

5700 Series SAE Class I Rotator

5715A

Oversized beacon design provides a solution for applications where a larger beacon shape is desirable. Features ECCO's heavy-duty gear drive rotator.

Features

- Twist-on lens allows easy bulb replacement.
- Self-lubricating heavy duty motor and gear assembly.
- Warranty: Rotator = 2 years / Bulb = 90 days
- Temperature Range: -22°F to +122°F (-30°C to +50°C)

Approvals

- AMECA certified to SAE J845 Class I (A, B, C & R).
- California Title 13 (A, B & R).

Replace X in part number with desired color: A = amber, B = blue, C = clear, G = green, R = red

A6400MB

A6400MBP

ECCO's diverse line of beacons offers a wide range of base types and mounting options to suit a variety of applications. Choose from bolted, pipe, J-Bolt, pole and magnetic versions, aluminum or plastic bases. In addition our convenient mirror bracket offers a fast permanent mounting with no holes required. (6200 / 6400 / 6500 & 7400 Series only)

PART NO.	DESCRIPTION	USED WITH
A6400MB	1" Pipe Mirror Bracket	6500, 7400 Series
A6400MBP	Mirror Bracket Adapter Plate	6200, 6400 Series (use with A6400MB)

Beacon Mounting Guide

6500, 6600, 6700, 6900, 7100, 7400, 7600, 7900 Series

3 Bolt - 3 x 7/32" holes required (optional 4th wiring hole) Secure with #8 hardware, Pipe - 1" NPT thread

6500 J-Bolt

J Bolt - 2 x 5/16" holes required (plus 3rd wiring hole) Secure with J-Bolts. Accessories available for 1" & 3/4" NPT pipe mount, magnet or flush mount.

6400 / 6460

3 Bolt - 3 x 3/16" holes required (optional 4th wiring hole) Secure with #10 hardware

6200 / 6260

2 Bolt - 2 x 7/32" holes required (plus 3rd wiring hole) Secure with #8 hardware, Pipe - 1/2" NPT thread

MAGNETIC MOUNTS

DO NOT FIT BEACON TO ANY ICE COVERED SURFACE
 · Always attach to clean, dry, smooth, non-porous, ferrous surface
 · Check beacon is secure BEFORE driving vehicle
 · Use tabs to release vacuum

5800 Series

1 Bolt - Rubber Base
 1 x 9/16" hole required
 Secure with 1/2" hardware

3 Bolt
 3 x 5/16" (plus 4th wiring hole)
 Secure with 1/4" hardware

Pole Fixing
 DIN#72591 accepts T or L fixing bracket

5700 Series

3 Bolt
 3 x 7/32" holes required (plus 4th wiring hole)
 #8 hardware, Pipe - 1" NPT thread

BEACON MOUNTING

Always mount beacons to the vehicle so the base is parallel to the ground as shown.

BULB / TUBE HANDLING

NEVER hold bulb or tube by the glass

ECCO® - Leading in Lighting

ECCO offers an extensive range of both minibars and full size lightbars, all manufactured with ECCO quality, delivered at ECCO speed and backed by ECCO customer service. Whatever your particular requirements, ECCO is sure to have the right product to suit your application and your budget.

Custom Lightbar Configuration

The lightbar configurations depicted in this catalog are only a small sample of our most popular models from the hundreds we have on file. Should you have a specific requirement that doesn't feature in this catalog you can always call us for additional specifications from our database. Alternatively ECCO offers a quick turnaround custom lightbar service enabling you to specify the exact components needed for your particular application. This service is available on 10, 15, 20, 30, 60 and 70 Series lightbars ensuring that whatever your need may be, ECCO can provide the solution. Check for the availability of custom configuration on the following pages, and call ECCO Customer Service at 1-800-635-5900 to order copies of our Faxback Lightbar Specifier or simply refer to the back of your ECCO price list.

10 Series LED Lightbar

Symbols / Features Guide

	LED - ECCO's unique LED module uses four 1-watt LEDs and advanced optics to create a wide-angle beam pattern with industry leading light output. Quad flash (80FPM).
	LED Corner Cluster - Utilizes 3 separate LED modules mounted at 30° to provide enhanced warning to the sides of the vehicle.
	LED Safety Director™ - Built in to the 10 Series primary warning LEDs, when activated the rear LED modules are controlled via the touch-pad, all other modules maintain primary flash patterns. Features 7 flash patterns and hi/lo intensity control. Number of lighthead dependent on configuration (amber).
	Cleversector™ - Pair of unique multifunction light modules can be used as takedown lights, an oscillating intersection clearing light, worklight and alley light (forward facing).

Warranty: Lightbar = 2 years / Electronic components = 5 years

Temperature Range: -22°F to +122°F (-30°C to +50°C)

Back lit, rubber key touch-pad provides finger tip control of built in Safety Director™ (included with safety director models).

H = 2" / 53mm W = 12" / 305mm

The 15 Series lightbar offers the long, maintenance free service life of LED technology along with maximum light output due to the unique optics of ECCO's LED modules. Each LED module features four 1-watt LEDs providing high intensity warning with the benefit of low amp draw. The stylish, low profile lightbar features an aluminum base and clear weather-proof polycarbonate housing along with an encapsulated power supply to provide strength, durability and protection against the environment.

Back lit, rubber key touch-pad provides finger tip control of built in Safety Director™ (included with safety director models).

SRS™ rotators offer enhanced side warning

Hinged lens allows easy field service.

Back lit, rubber key touch-pad provides finger tip control of built in Safety Director™ (included with safety director models).

CUSTOM CONFIGURATION AVAILABLE

20-00042-E

The unique shape of the 20 Series lightbar ensures a smart, roof hugging fit for any car or pick-up truck application. The twin deck design features an aluminum base and hinged polycarbonate lens for durability and ease of maintenance, along with offering additional lighting options including an integral Safety Director™ and the unique Cleversector™ on the lower deck.

Symbols / Features Guide

TOP DECK:

Rotator - SRS™ Staggered Rotator System provides visibility of both rotators at each end of the lightbar. Features smooth operation, gear driven rotators. (55W Bayonet, RPM: Outboard = 150, Inboard = 90)

Mirrors - Diagonal mirrors reflect light to front and rear without obstructing visibility of rotators at the end of the lightbar.

LOWER DECK:

Halogen Safety Director™ - Controlled via touch-pad, multiple flash patterns available (35W). Number of lighthead dependent on configuration. (Amber)

Cleversector™ - Pair of unique multifunction light modules can be used as takedown lights, an oscillating intersection clearing light, worklight and alley light (forward facing).

Warranty: Lightbar = 2 years / Bulb = 90 days

Temperature Range: -22°F to +122°F (-30°C to +50°C)

CUSTOM
CONFIGURATION
AVAILABLE

Chassis Diagram Key

H = 5.1" / 130mm W = 12" / 305mm

Back lit, rubber key touch-pad provides finger tip control of built in Safety Director™ (included with safety director models).

The twin deck design of the 30 Series lightbar maximizes lighting options allowing unobstructed light output of the primary warning lights on the upper deck and offering various auxiliary lighting options on the lower deck. Featuring an aluminum base and hinged polycarbonate lens for durability and ease of maintenance, the 30 Series is available in a wide range of standard configurations.

Symbols / Features Guide

TOP DECK:

- Rotator** - SRS™ Staggered Rotator System provides visibility of both rotators at each end of the lightbar. Features smooth operation, gear driven rotators. (55W Bayonet, RPM: Outboard = 150, Inboard = 90)
- Linear Strobe** - V configuration, quad flash linear strobes provide high intensity 360° warning with no 'sun washout' (Quad flash 80FPM - fitted in fours, positioned at 45° to each corner).
- Mirrors** - Diagonal mirrors reflect light to front and rear without obstructing visibility of rotators at the end of the lightbar.
- Stop, Tail, Turn Lights** - Pair of rear facing high-level auxiliary signal lights
- Worklights** - Pair of rear facing 55W adjustable halogen worklights.

LOWER DECK:

- Alternating Halogens** - Front or rear (F/R) facing small amber alternating directional halogen lights, fitted in pairs (35W).
- Alternating LEDs** - Front or rear (F/R) facing amber alternating LEDs, fitted in pairs.
- Halogen Safety Director™** - Controlled via touch-pad, number of light heads dependent on configuration, multiple flash patterns available (Amber 35W).

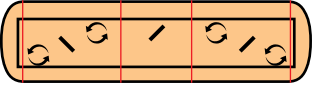

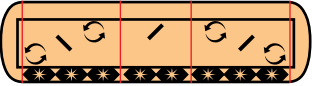

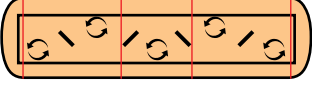

Warranty: Lightbar = 2 years / Bulb = 90 days / Flashtube = 6 months

Temperature Range: -22°F to +122°F (-30°C to +50°C)

60 Series - *EVOLUTION*[®] SAE Class I - Single Deck Lightbar

6603060

CUSTOM
CONFIGURATION
AVAILABLE

Chassis Diagram Key

ECCO's 60 Series lightbars are available in a wide variety of configurations offering a high level of functionality in a compact, low profile and aerodynamic housing. 60 Series lightbars feature ECCO's low noise, belt-drive rotator incorporating free-form reflectors for a larger, more powerful beam pattern.

Symbols / Features Guide

- Rotator** - In-line belt driven rotator modules provide smooth, quiet operation. Reflectors incorporate free-form optics for enhanced light output and beam spread. (55W H1 bulb / 160 FPM)
- 360° Strobe** - Double/Quad flash 360° fresnel strobes with helical flashtubes, powered by heavy-duty ECCO power supplies. (User selectable: 70 Double / 65 Quad FPM & Hi/Lo intensity)
- Directional Strobe** - Double/Quad flash front and rear large directional strobes with helical flashtubes. Powered by ECCO power supplies, fitted in fours. (User selectable: 70 Double / 65 Quad FPM & Hi/Lo intensity).
- Mirrors** - Stainless steel V and diamond mirrors (dependent on configuration).

- Alternating Halogens** - Front or rear (F/R) facing large amber alternating directional halogen lights, fitted in pairs (50W).
- Stop, Tail, Turn Lights** - Pair of rear facing high-level auxiliary signal lights
- Worklights** - Pair of rear facing 55W adjustable halogen worklights
- DOT Lights** - Maintenance free LED DOT strip

Warranty: Lightbar = 2 years / Bulb = 90 days / Flashtube = 6 months
Belt = ECCOLIFE[™]

Temperature Range: -22°F to +122°F (-30°C to +50°C)

SAE Class I - 22" Rotating SAE Class II - 22" Strobe

This economical minibar provides a robust, high visibility warning solution featuring ECCO's heavy-duty gear driven rotator or dual alternating strobes.

Features

- ▶ Coated aluminum base and polycarbonate lens.
- ▶ Self-lubricating motor and gear rotator assembly (rotating).
- ▶ Reverse polarity, voltage spike and surge protected (strobe).
- ▶ Warranty: Minibar = 2 years
Bulb (rotating) = 90 days
Flashtube (strobe) = 6 months
- ▶ Temperature Range: -22°F to +122°F
(-30°C to +50°C)

Approvals

- ▶ SAE J845 Class I (except 5221003)
- ▶ SAE J1318 Class II (AAA & CAA only)
- ▶ CE

5000 Series 17" LED Minibar

Features

- Permanent mount or magnet mount (with 12' cord and switched cigarette plug)
- Configurations:
8 head (2 end, 3 forward and 3 rear facing),
10 head (2 end, 4 forward and 4 rear facing)
- 7 flash patterns, selectable via trigger wire (push-button on magnet mount version)
- Warranty: 2 year
- Temperature Range: -22F to +122F (-30C to +50C)

Amber illumination only available

This budget conscious LED minibar features 7 flash patterns and offers a choice of either 8 or 10 LED modules, each comprising 40 LEDs. The 5000 Series provides many benefits including its compact size, available magnet mounting option and multiple flash patterns, as well as all the usual LED benefits of low amp draw and a long, maintenance-free service life. The 5000 Series LED minibar provides a convenient, high output LED lighting solution in a compact and cost-effective package.

5180 Series 15" LED Minibar

NEW

5188CA-VM

This versatile LED minibar offers many features and benefits including its compact size, available vacuum-magnet mounting option, multiple flash patterns and synchronization capability (permanent mount only). The Blaze™ II LED minibar is available in 6 or 8 head configurations, each featuring four high intensity 1-watt LEDs per head. Other major benefits include low amp draw and long, maintenance-free service life backed by a 5 year warranty. The Blaze™ II LED minibar provides a convenient, high performance LED lighting solution in a cost-effective package.

Features

- Compact, low profile, high intensity LED minibar.
- Configurations:
 - 6 head (4 corner, 1 forward and 1 rear facing)
 - 8 head (4 corner, 2 forward and 2 rear facing)
- Flash patterns: (vary by configuration, selectable via internal electronics)
 - Permanent Mount Models - 2 flash patterns
 - Vacuum-Magnet Models - 3 flash patterns
- Multiple permanent mount versions can be synchronized.
- Vacuum magnet versions feature 2 factory fitted vacuum magnets and 15' straight cigarette cord with switched plug.
- Warranty: 5 years (electronic components)
- Temperature Range: -22°F to +122°F (-30°C to +50°C)

ROTOLED™ - 5280 Series SAE Class I 13" LED Hybrid Minibar

The 5280 Series RotoLED™ Minibar combines all the benefits of the latest LEDs with the unmistakable warning signal of a rotator, without compromising reliability. LED hybrid technology uses a brushless magnetic drive system to spin the reflector disk, reducing noise and eliminating the typical motor/gear drawbacks associated with conventional rotators. Each hybrid module also features eight 3-watt LEDs and TIR optic to provide SAE Class I light output. Additional benefits include an extended, service free life, low amp draw and a 5 year warranty.

3510 Series

SAE Class I Surface Mount LED Light Head

3510A

The 3510 surface mount LED warning light is designed to offer maximum performance with minimum size. This slimline LED measures only 3.3" x 1.1" and only 0.4" deep, comprising of 24 1-watt high-intensity LEDs in an ultra compact housing. This small footprint allows for mounting in almost any location on a vehicle body. Synchronizable with additional 3510s and any Hide-A-LED model, the 3510 includes multiple flash patterns and is available in amber, blue, clear and red (colorless when not illuminated).

Features

- 24 1-watt high-intensity LEDs provide exceptional warning.
- 16 flash patterns including single, double, triple, quad, deci and cycle all.
- Synchronizable with additional 3510s and any Hide-A-LED (see pages 50-51).
- In-line waterproof driver module allows for premium functionality and compact size.
- UV stabilized polycarbonate lens and pre-wired 9' cable.
- Colorless when not illuminated.
- Warranty: 5 years
- Temperature Range: -22°F - +122°F (-30°C - +50°C)

Approvals

3710/3760 Series SAE Class I Surface & Grommet Mount LED Light Heads

3710A

These versatile LEDs are available in either surface (3710) or grommet (3760) mount configurations. Both models feature four 1-watt LEDs, offer multiple flash patterns, synchronization capability and SAE Class I operation. The surface mount model features lambertian LEDs and a unique optic while the grommet mount version uses side-emitting LEDs and unique reflector design to provide outstanding light output. The 3760 model also has the added benefit of two California Title 13 flash patterns.

Features

- ▶ Robust die-cast coated aluminum housing with epoxy encapsulated electronics (3710, surface mount model).
- ▶ Tough clear polycarbonate lens with reinforced nylon housing and urethane encapsulated electronics (3760, grommet mount model).
- ▶ Grommet mount model fits standard oval rear lighting grommet (order separately).
- ▶ Steady Burn, Double, Fast Double, Quad and Quint flash patterns plus four integral alternating flash modes. 3760, grommet mount model also features two Cal. T13 flash patterns.
- ▶ Discrete units are colorless when not illuminated.
- ▶ Multiple units can be synchronized.
- ▶ LEDs offer a long, maintenance free service life.

3730 Series SAE Class II Surface Mount LED Light Head

3730A

This compact LED has very similar features to the 3710 Series but is considerably smaller, comprising only three 1-watt LEDs. The 3730 provides a budget conscious option where a premium light with SAE Class II operation is required. Its compact size and ability to fit confined mounting locations, multiple flash patterns, synchronization capability, zero maintenance and 5 year warranty are just some of its many benefits. A range of accessory brackets is also available to further maximize mounting options.

3810/3860 Series SAE Class I Surface & Grommet Mount LED Light Heads

3810A

3810/3860 Series directional LEDs comprise 42 individual 1/4 watt LEDs with individual reflectors to provide truly outstanding light output in a very cost effective package. Available in either surface (3810) or grommet (3860) mount configurations these quad flash LED light heads offer fit and forget, maintenance free operation and low amp draw.

Features

- Tough, clear polycarbonate housing with urethane encapsulated electronics.
- High output 75 FPM quad flash operation.
- Discrete units are colorless when not illuminated.
- Grommet mount versions fit standard oval rear lighting grommet (order separately).
- LEDs offer a long, maintenance free service life.

9010/9011/9021/9031 Series Concealed Warning Lights

These high intensity directional LED warning lights are specifically designed for vehicle headlight and tail light applications. The 9010's design produces directional light output and can be positioned to project light directly through the front of the headlight or back at the reflective light casings to produce a less intense, indirect flash. The 9011, 9021 & 9031's optic design produces wide angle light dispersion and maximizes secondary light output reflected off the vehicle light casing. Multiple flash patterns are included and multiple units can be synchronized to flash alternately or simultaneously. Additional benefits of LED technology include high intensity light output, low current draw and a long and maintenance-free service life.

Features

- Four 1-watt high-intensity LEDs provide exceptional warning.
- 9010's directional light dispersion produces direct, intense flash
- 9011, 9021 & 9031's wide angle light dispersion maximizes light casing reflection and mounting options.
9011 = 1 head / screw-on
9021 = 2 head / screw-on
9031 = 1 head / plug-in
- 16 Flash patterns including single, double, triple, quad, deci and cycle.
- Multiple heads are synchronizable (simultaneous or alternating operation).
- Colorless when not illuminated.
- In-line waterproof driver module eliminates the need for a remote power supply.
- UV stabilized polycarbonate lens, nickel plated housing and 9' cable.
- Warranty: 5 year
- Temperature Range: -22F to +122F (-30C to +50C)

- Warranty: 5 year
- Temperature Range: -22F to +122F (-30C to +50C)

Hide-A-LED™ - 9012 Series Concealed Warning Light

NEW

Similar to the 9011 series unit, the 9012 features two additional 1-watt LEDs providing super high-intensity light output. The LEDs' low profile allows mounting in small, confined light casings typical of tail lights and modern car headlights. Available in solid or multi-color models. 2-color multi models alternate outer two LED sets with inner LED set. 3-color models cycle through left, center, right LED sets. Sealed in-line driver module eliminates need for a remote power supply. Also features multiple flash patterns and synchronization capability. Additional benefits of LED technology include high-intensity light output, low current draw and a long maintenance-free service life.

9200 Series 2 Head Remote Strobe System

9230

The 9200 Series 2 Head Power Supply is feature-packed and built to withstand the toughest applications. Due to its unique heavy-duty design the unit can be mounted anywhere on the vehicle, inside or out. The power supply, strobe heads and cables can be purchased individually or in a variety of standard systems.

Features

- Power supply has compact die-cast aluminum housing and epoxy encapsulated electronics.
- Weatherproof housing and connections allow mounting anywhere on vehicle.
- Hide-away or directional strobe systems available.
- Hi/Lo intensity and Double/Quad flash operation.
- Short circuit protection, output power regulation and flashtube fault detection.
- Warranty: Power Supply = 2 years
Flashtube = 6 months
- Temperature Range: -22°F to +122°F
(-30°C to + 50°C)

9400 Series 4 Head Remote Strobe System

9460

The feature-packed 9400 Series Power Supply is designed and built to withstand the toughest applications. Weatherproof connections and epoxy-filled housing with capacitor heat dissipation cradles are why this power supply offers unrivaled protection against heat, vibration, dust and moisture. Available in many system configurations, and as individual components.

9600 Series 6 Head Remote Strobe System

NEW

9660

The 9600 Series 6 head power supply features 15 flash patterns including Quad, Quint, Mega, Double, Single, Warble, and Cycle. Twin diagnostic LEDs also make it simple to locate system faults in the field as the output LED indicator lights when any strobe head fires and blinks in exact time with the flash pattern. Also features 60-watt operation, hi/lo intensity control, glass-filled nylon housing and reverse-polarity protection. Available as individual components or a preconfigured system with four clear tubes and four 15' cables.

Features

- ▶ Glass-filled nylon housing
- ▶ 60-watt power system
- ▶ 15 flash patterns
- ▶ Switchable hi/lo intensity control
- ▶ Plug-in switch console available (order separately A9660SW)
- ▶ Short circuit protection, output power regulation and flashtube fault detection
- ▶ Warranty: Power Supply = 2 years / Flashtube = 6 months
- ▶ Temperature Range: -22F to +122F (-30C to +50C)

2000 Series Remote Strobe & LED Systems

Features

- In-cab control box with LED flash indicators and auxiliary strobe light control switch.
- 8 user-selectable flash patterns.
- LED systems offer low maintenance and long life.
- Uses standard 14-18 gauge wire (user supplied).
- Warranty: 2 years / Flashtube = 6 months
- Temperature Range: -22°F to +122°F (-30°C to + 50°C)

Approvals

- SAE J1318 Class II (2550 & 2570)
- CE

The Navigator® lighting system offers ultimate control of all your vehicles warning lights. 8 Channels, 8 Flash patterns, a deluxe control unit and the ability to combine Strobe and LED make the Navigator® a highly flexible lighting system. Uses standard 14-18 gauge wire to connect components (not supplied), build your own system by selecting the control box (below) and up to 8 light heads from the opposite page.

Look For The Original

Over the last 35 years ECCO has become the worlds leading back-up alarm supplier. That's why ECCO's range of back-up alarms offers the most extensive selection in the industry, covering a wide variety of applications & environments. We are committed to bringing ground-breaking products to the back-up alarm industry.

Built to Last

Designed to meet all the harsh operational requirements of any fleet's equipment, ECCO's unique 400, 600 & 800 Series alarm design uses a reverse mounted speaker providing unrivalled durability. These alarms are so robust that an ECCOLIFE™ warranty covering the alarm for the life of the vehicle is offered on all models. Look for the ECCOLIFE™ logo.

The unique positioning of the speaker facing the inside of the housing allows for high pressure washing or steam cleaning without risk of speaker damage. In addition it offers no place for fine dust to build up and reduce the alarms efficiency. Epoxy encapsulated circuit boards offer further protection from dust, moisture and vibration.

AMECA Certification

Many of ECCO's alarms are now independently certified by AMECA to meet SAE J994 requirements, ensuring our alarms meet customer's highest quality expectations. Our Engineering Test Lab is certified by the Automotive Manufacturers Equipment Compliance Agency (AMECA) to perform testing as per the Society of Automotive Engineers (SAE) requirements. ECCO test reports are reviewed by AMECA and Notice of Equipment Compliances are issued. These are denoted here as AMECA certified and indicated on the SAE Indicator shown with each alarm.

► dB(a) output measured at a distance of 4' / 1.2m

Side View Cutaway

Design allows for high pressure washing without damaging alarm.

ECCO® Trademarks & Patents

The distinctive ECCO trademarks, trade dress, product designs, and configurations shown here with asterisks are recognizable throughout the world as unique to ECCO. They are synonymous with product quality and conformance to industry standards and are the sole and exclusive property of ECCO. All rights reserved.

SAE Classification Indicator

Featured on the following pages, the SAE Classification Indicator is designed to aid product selection, making it easier for customers to purchase the correct alarm for their application. In addition to SAE type the indicator also designates the alarm features, warranty, and AMECA certification where applicable.

Special Feature

This designation indicates alarm output can be set to various output levels.

SAE Type [dB(A) level]

Special Feature

This designation indicates alarm monitors the ambient noise level and automatically adjusts to a minimum of 5 dB(A) above ambient noise level, up to a maximum rated output.

Warranty:

ECCOLIFE™ Life of Vehicle Warranty

SMART ALARM®

Noise Pollution Solutions™

ECCO's range of Smart Alarms® are the worlds first self-adjusting back-up alarms. The alarms featured on these pages constantly measure ambient noise and adjust their sound level, creating a volume that is safe without being annoying or contributing to noise pollution. Smart Alarms® eliminate the need for constant manual adjustment and help prevent intentional alarm disconnection.

How Smart Alarms® adjust to the environment

- ▶ 100% solid state electronic circuit boards are epoxy sealed to protect against dust, moisture and vibration.
- ▶ Reduces irritation and noise complaints.
- ▶ Eliminates confusion on which alarm to choose.
- ▶ Temperature range: -40°F to +185°F (-40°C to +85°C)
- ▶ Designed to meet SAE J994, Type F

40 Series

- ▶ For use with standard 4.5" rear lighting grommet (order separately).
- ▶ Directs warning to rear of vehicle.
- ▶ 2 Year Warranty

Prevention Pays

There is overwhelming evidence showing the majority of accidents involving work vehicles (both on and off road) happen while vehicles are backing up. Each year countless incidents result in fatalities, injuries and/or costly damage to vehicles, equipment and property. ECCO's extensive line of camera systems is designed to offer a solution for every type of vehicle application in order to help prevent expensive accidents, eliminate workplace injuries and ultimately save lives.

Safety & Security

In addition to reversing safety, ECCO camera systems have many additional applications including side and/or front vision on large semi trucks and construction equipment, boom vision on access equipment, cranes or large material handling equipment as well as for vehicle security applications including transit bus, school bus and secure transportation.

Premium Quality, Premium Performance

All ECCO camera systems are manufactured to the highest quality and performance standards, offer premium features and utilize the latest technology to deliver a reliable, crystal clear image. All systems provide rugged dependability backed by a hassle free 1 Year warranty.

NEW

Gemineye™
CAMERA / DATA STORAGE SYSTEM

– Sets the Standard

Our Gemineye™ line of LCD systems is one of the most durable and flexible camera offerings available allowing you to choose from a base kit and, if desired, expand it with additional camera and peripheral options. Alternatively you can use our Camera System Specifier on page 9, choosing individual components to create the perfect system for your application. From compact 3.5" monitors to 7.0" widescreen monitors with multi camera, split-screen viewing capability and mini flush mount cameras to full featured automatic shutter cameras, Gemineye™ offers options to suit any need.

Suggested Applications

| • Utility Truck | • Highway Maintenance / DOT | • Mobile Crane |
| • Semi Truck | • School Bus | • Heavy Construction Equipment |
| • Drawbar Truck | • Bus | • Mining & Quarrying Equipment |
| • Panel Van | • Coach | • Forestry & Agricultural Equipment |
| • Street Sweeper | • RV (Motorhome) | • Landfill Equipment |

K5010

Basic 5.0" CRT B&W System (Integral Controller)

This black & white camera system with 5.0" CRT monitor provides exceptional picture and sound quality in a cost effective package. Kit is expandable up to 2 cameras (C101 only).

Features

- ▶ 5.0" CRT monitor with volume, brightness, contrast, day/night, mirror imaging control & camera 1 or 2 and camera or AV selection.
- ▶ Automatic camera selection via trigger wire (when reverse gear or relevant control engaged).
- ▶ Audio/Video input jacks allow VCR/DVD playback.
- ▶ Black & white camera with audio (included). Expandable up to 2 cameras (C101 only).
- ▶ 18m/60' transmission cable.
- ▶ 12-24 VDC
- ▶ FCC, CE, E

ECCO's most compact camera system offers an ideal solution for non commercial and light duty applications where dashboard or cab space is limited. The flat 3.5" LCD color monitor provides a clear, easily viewable image without compromising space and includes a suction cup bracket for temporary window or surface mounting. The high resolution monitor and flush mount camera deliver excellent picture quality. Kit is expandable up to 2 cameras.

Features

- ▶ 3.5" LCD color monitor with built in controller features contrast and brightness control and camera 1 or 2 selection.
- ▶ Automatic camera selection via trigger wire (when reverse gear or relevant control engaged).
- ▶ Flush mount color camera with aluminum alloy housing (included), expandable up to 2 cameras.
- ▶ 5m/16' transmission cable/power harness (2 camera)
- ▶ 12-24 VDC
- ▶ E, IP68 (camera)

* Additional cables are not required when expanding K5010 & K3500 kits to 2 cameras as the C101 camera includes an additional 18m/60' cable while the K3500 kit includes a 5m/16' 2 camera cable.

All cameras are color unless otherwise stated.

5.6" LCD SYSTEMS

5.6" LCD monitors are now the standard in vehicle camera system applications offering compact and unobtrusive mounting inside the operator area while delivering a relatively large, reliable and sharp image in all operating conditions. Systems are available that are expandable up to 4 cameras providing optional side view capability with automatic camera selection for lane changes and manual selection for close quarters maneuvering.

- ▶ 12-24 VDC
- ▶ FCC, CE, E, IP68 (camera)

K5600 – 5.6" LCD Color System (Integral Controller)

Comprising a feature packed 5.6" LCD high resolution color monitor and standard color infrared camera the K5600 delivers excellent picture quality even in low light conditions. The compact monitor allows for unobtrusive installation without compromising viewable screen area. Kit is expandable up to 2 cameras.

Features

- ▶ 5.6" LCD color monitor with built in controller features volume, contrast, brightness, day/night, mirror imaging control & camera 1 or 2 selection.
- ▶ Automatic camera selection via trigger wire (when reverse gear or relevant control engaged).
- ▶ Standard color camera with audio & infrared (included), expandable up to 2 cameras.
- ▶ 20m/65' transmission cable.

All the great features of the K5600 with the added functionality of an external controller providing 4 camera capability and touchpad operation. Featuring a 5.6" LCD high resolution, color monitor and standard color infrared camera the K5601 delivers excellent picture quality even in low light conditions. The compact monitor and remote mounted controller allows for unobtrusive installation without compromising viewable screen area or functionality. Kit is expandable up to 4 cameras.

Features

- ▶ 5.6" LCD color monitor features volume, contrast, brightness, day/night, mirror imaging control.
- ▶ External 4 channel controller allows expansion up to 4 cameras.
- ▶ Touchpad offers fingertip camera selection.
- ▶ Automatic camera selection via trigger wire (when reverse gear or relevant control engaged).
- ▶ Standard color camera with audio & infrared (included), expandable up to 4 cameras.
- ▶ 20m/65' transmission cable.

Gemineye™ – K5601 5.6" LCD Color System (External Controller)

With a 5.6" LCD high resolution monitor and black & white infrared camera the K5602 provides a bright, clear picture even in adverse light conditions. The compact monitor allows for unobtrusive installation without compromising viewable screen area. Kit is expandable up to 2 cameras (C1000 only).

Features

- ▶ 5.6" LCD monitor with built in controller features volume, contrast, brightness, day/night, mirror imaging control & camera 1 or 2 selection.
- ▶ Automatic camera selection via trigger wire (when reverse gear or relevant control engaged).
- ▶ Black & white camera with audio & infrared (included), expandable up to 2 cameras (C1000 only).

7.0" WIDESCREEN LCD SYSTEMS

7.0" widescreen LCD monitors offer the same benefits as a 5.6" LCD as well as a significant improvement in viewable area with only a small increase in physical size. The standard for bus and long distance coach applications, a major advantage of a 7.0" monitor is the ability to easily view up to 4 cameras simultaneously using a split screen controller. This is ideal for multi camera applications using 1 rear view, 1 interior view and 2 side view cameras for example.

- ▶ 12-24 VDC
- ▶ FCC, CE, E, IP68 (camera)

K7000 – 7.0" LCD Color System (Integral Controller)

The 7.0" LCD high resolution color monitor included with this kit provides the optimal viewing area for mobile CCTV applications. Excellent picture quality is assured even in low light conditions using ECCO's standard color infrared camera. The flat, widescreen monitor allows unobtrusive mounting with a large, easily viewable screen area. Kit is expandable up to 2 cameras.

Features

- ▶ 7.0" widescreen LCD color monitor with built in controller features volume, contrast, brightness, day/night, mirror imaging control & camera 1 or 2 selection.
- ▶ Automatic camera selection via trigger wire (when reverse gear or relevant control engaged).
- ▶ Standard color camera with audio & infrared (included). Expandable up to 2 cameras.
- ▶ 20m/65' transmission cable.

- Light Sensor: Auto switches to black & white image in low light conditions
- Aluminum alloy camera housing

Resolution (pixels): 500(H) x 582(V)
Power consumption: ≤1.5W
Mechanical vibration: 8G
Image: 1/4" Sony CCD
Lens angle: 110° (diagonal)
Weight: .6 lbs
Dimensions: 2.55(H) x 2.44(W) x 3.72(D)
Operating temp: -22°F to +149°F
Plug: 4 pin
IP rating: IP68

C2004 – Flush – Color Camera

- Flush mounts in bodywork/ bumper
- Aluminum alloy housing

Resolution (pixels): 500(H) x 582(V)
Power consumption: ≤1.2W
Mechanical vibration: 8G
Image: 1/4" Sony CCD
Lens angle: 150°
Weight: .3 lbs

Dimensions: Flange Dia. - 1.22
Body Dia. - 1.06
Length - 1.83
Operating temp: -22°F to +149°F
Plug: 4 pin
IP rating: IP68

controllers

CB20 – 2 Camera Controller

- Allows input of up to 2 cameras
- Automatic switching to rear view when reverse gear engaged
- Audio/video in and out jacks allow DVR/VCB connection
- Includes touchpad camera selection control

Max cameras: 2
Power supply: 12-24 VDC
Power consumption: 9W
Dimensions: 1.31(H) x 6.16(W) x 2.96(D)
Weight: .8 lbs
Plug: 6 pin (requires ADPT-46 adapters for use with 4 pin cameras (order separately))

CB40 – 4 Camera Controller

- Allows input of up to 4 cameras
- Automatic switching to rear view when reverse gear engaged
- Audio/video out jacks
- Includes touchpad camera selection control

Max cameras: 4
Power supply: 12-24 VDC
Power consumption: 9W
Dimensions: 1.31(H) x 6.16(W) x 2.96(D)
Weight: .8 lbs
Plug: 4 pin (not for use with C2001 shutter camera)

CB41 – 4 Camera Split Screen Controller

- Allows input of up to 4 cameras
- Allows split screen viewing of all cameras simultaneously or single cameras individually
- Automatic switching to rear view when reverse gear engaged
- Audio/video out jacks
- Includes touchpad camera selection control including quad/single view selection

Max cameras: 4
Power supply: 12-24 VDC
Power consumption: 18W
Dimensions: 1.32(H) x 6.10(W) x 3.51(D)
Weight: 1.0 lbs
Plug: 6 pin (includes ADPT-46 adapters required for use with 4 pin cameras)

digital video

DVR04A

4 Channel Digital Video Recorder

- 2.5" disk drive with internal shock and vibration resistant mounting (order memory separately)
- External USB download port and mini-USB download port on internal 2.5" disk drive (download cables included)
- Individual trigger wires included for each camera channel

Power supply: 12-24 VDC
Power consumption: <42W
*Storage capacity: 80GB, 120GB
Compression format: MPEG 2 DVD
Dimensions: 4.45(H) x 11.04(W) 11.18(D)
Weight: 13 lbs (excluding memory disk)
Operating temp: +41°F to +122°F
Humidity: <90%
Mechanical vibration: 5G
*Requires Digital Video Memory disks (sold separately)

Digital Video Memory

Digital memory disks for use with DVR04A digital video recorders

DVM80A	80GB
DVM120A	120GB

mounting brackets

MB01

cable adapters

ADPT-05

Monitor replacement adapter for legacy camera systems using M525 monitor (discontinued). (Female 16 / Male 13)

ADPT-07 – S-video to VHS

(S = Male 4 / VHS = Female 4)

ADPT-08 – S-video to VHS

(S = Female 4 / VHS = Male 4)

ADPT-46AE

4-6 pin adapter (Female 4 / Male 6)

ADPT-DVR01

Controller to camera & DVR "Y" cable (4 pin)

ADPT-DVR02

Controller to camera & DVR "Y" cable (6 pin)

ADPT-RCA01

DVR to Controller (CB20) adapter (s-video / RCA in)

ADPT-RCA02

DVR to Controller (CB20) adapter (VHS / RCA out)

1

choose a monitor

2

choose camera(s)

* C2001 Automatic Shutter Camera uses a 6 pin transmission cable. This camera is only for use with M5601 or M7001 Monitors in conjunction with a CB20 or CB41 (6 pin) Controller. A TC20-6 (6 Pin Cable) is also required for the shutter camera to operate correctly.

** C2004 requires ADPT08 adapter to operate with all monitors except M3500.

3

choose a controller

*** CB20 & CB41 Controllers feature 6 pin connections to allow functionality of C2001 Automatic Shutter Camera. ADPT-46 4-6 Pin Adapters are required for the connection of 4 pin cameras (supplied with CB41, order separately when using CB20). CB40 Controller features 4 pin connections and is not for use with C2001 Automatic Shutter Camera.

4

choose cable(s)

*** TC20-6 6 Pin Cable required for operation of C2001 Automatic Shutter Camera

5

A6070DC	Medium Profile	6570, 6670, 6690, 6770, 6970, 6990, 2570, 2670, 2675, 2690, 2695 & 9070

Lens Covers

PART NO.	DESCRIPTION	USED WITH
A6400HC	Half Lens Cover	6400 Series
A6600HT	Half Lens Cover	6500, 6600, 6700, 6900, 7900 Series
A6400BT	Black Top	6400 Series
A6501BT	Black Top	2550, 2570, 2650, 2670, 9050, 9070, 2600 Series

Dome Screws / Clips

PART NO.	DESCRIPTION	USED WITH
R109-927	Lens retaining clip small	10 / 15 Series
R209-927	Lens retaining clip large	10 / 20 / 30 Series
R109-942	Lens retaining screw	10 Series
R159-942	Lens retaining screw	15 Series
R309-942	Lens retaining screw	30 Series
R209-921	Lens joining clip	10 / 15 / 20 / 30 Series
R0004	End cap	60 / 70 Series
R0005	Baffle-amber	70 Series
R0006	Baffle-clear	70 Series
R0007	Baffle-amber	60 Series
R0008	Baffle-clear	60 Series

Switches & Control Boxes

PART NO.	DESCRIPTION	USED WITH
A9000	Switchbox - 6 switch 12V	 A9000  A9891 & A9893 Depicted  R3000CB  RM4DIRC
A9901	Illuminated 12V	
A9891	Illuminated 12V-Amber-SPST	
A9892	Illuminated 24V-Amber SPST	
A9902	Bracket - end section	
A9903	Bracket - center section	
A9904	Bracket mounting kit	
A9893	Switch panel - single slot	
R3000CB	Director Controller	
R3300CB	LED Director Controller	
RM4DIRC	Director Controller (LED/Halogen)	

Signal Bars

PART NO.	DESCRIPTION	USED WITH
R3015LB	With 15' cable, Incandescent 12V	 R3015LB  R3315LB
R3215LB	With 15' cable, Incandescent 24V	
R3015HLB	With 15' cable, Halogen 12V	
R3315LB	With 15' cable, LED 12V	
R3415LB	With 15' cable, LED 24V	
R3235LB	With 35' cable, Incandescent 12V

Local Presence in Global Markets

ECCO Group Facts

- ECCO started in 1972
- Current leadership since 1985
- ECCO Group Headquarters located in Boise, Idaho
- North American Emergency Services Division located in Colchester, Connecticut.
- European Division located in Leeds, England
- Pacific Asia Division located in Launceston, Tasmania
- ECCO Group formed in 2004
- 80% of ECCO's revenue comes from products introduced since 1998
- World's largest manufacturer of back-up alarms
- World's largest manufacturer of amber warning lights and back-up alarms combined
- Industry leader in innovation and new products
- World's most complete range of emergency warning products for commercial vehicles
- Serving over 1000 distributors globally
- Supplying over 500 vehicle manufacturers worldwide

Industry "Firsts"

- First company founded to specifically manufacture back-up alarms
- First manufacturer of amber warning lights and back-up alarms to be registered to ISO 9001 international quality standards
- The Smart Alarm® was the first self-adjusting back-up alarm
- The Smart Strobe® was the first self-adjusting strobe beacon
- First flush mounted back-up alarm in a standard 4.5" lighting grommet
- First Reverse Motion Sensor that activates the alarm every time vehicles move backward . . . in any gear . . . ignition on or off
- First company to offer life of the vehicle warranty on heavy duty back-up alarms
- First single unit back-up alarm and first single unit strobe light to cover 12-80 VDC range
- First strobe light with field-selectable flash rate and light intensity adjustment
- The Navigator® was the first remote system to integrate LED and strobe warning lights and the first LED warning system for vehicles
- First back-up alarms to be AMECA certified to SAE standards
- i.beam® was the first strobe beacon with a diagnostic signal to replace the flash tube
