

What is critical care and cancer coverage?

Critical care and cancer coverage are both types of health insurance that provide you and your family with money to deal with serious medical issues. This type of supplemental insurance helps you pay for out of pocket costs like copays, coinsurance and lost work due to treatment

You can customize your policy to help manage risks like heart attack, stroke or cancer.

PETER SCOTT

Critical Care & Cancer Coverage Options

How are critical care and cancer coverage different from health insurance?

Cancer and critical care coverage work with your current health insurance. They do not replace it. These types of plans provide you with money to pay for costs you incur during treatment like deductibles, copays and coinsurance.

Cancer is striking more people at an earlier age

Unfortunately, cancer rates are rising and more young people are being affected.

There is no good time to get a cancer diagnosis, but having the resources to support you through treatment can offer enormous relief.

I know this first hand from when my wife was diagnosed at age 43.

Help With Out Of Pocket Costs On Your Terms

These types of plans can be customized to meet you and your family's needs. Here are some common options:

Lump Sum Payments

Receive a lump sum payment when you're diagnosed to use however you need it.

Indemnity Options

Benefits are paid each time you have to get a treatment, surgery or other covered procedure.

Tailored To Your Needs

You can select your benefit amounts to fit with your personal needs.

Focus On Recovery

When my wife was diagnosed, we could focus on her treatment instead of worrying about how we were going to pay for it.
