

## Card Decks

When using any type of cards it is always best to conduct a prayer, light a candle, or ask for protection prior to conducting any reading. Continue to practice and don't give up. It may be difficult in the beginning but practice makes perfect. Always listen to your intuition, thoughts, or images that come to you during a reading. It is through this method that spirit gives us information. It is not suggested to rely on the book that accompanies the card for it should only be a reference. It is through one's psychic gifts that the messages come through. Speak or write what comes to your mind and try not to doubt or question it.

**Tarot Cards** are a spiritual development tool used to communicate with the spirit world. It allows us to access the energies of the universe and channel them into the cards in order to perform a reading. Whether for us, or for another individual, it allows us to attain advice from the spirit world. In the form of the imagery and identification on the cards we receive answers and advice to questions about our daily lives. There are many different Tarot Decks to choose from. However, a Divine Tarot Deck is one that I recommend.

**Oracle Cards** are a simpler reading involving a three card draw. This draw of the cards can represent Past, Present, and Future to the question you're answering. It can also be used as a three card to answer the question of concern. Oracle Cards are easier for beginners, for Tarot Cards are much more detailed in their meanings. As one advances on their spiritual path, one then can move onto Tarot Card decks.

**Medicine Cards, Angel Cards, Numerology Cards, and Reiki Cards** are really not necessary. These cards are more for a quick and easy answer, and often they may provide insight on the question asked.

**Joseph Rael Visionary Cards** are cards that are used to direct an individual on a certain path. They are of a Native American Tradition. These are not for answering certain questions, but to give someone insight on their Shamanic path. They are similar to medicine cards but are unique in their own way.

All card decks are to be used to provide reinforcement about our decisions in our lives through the aid of Angels. One should never summon or invite any other spirit beings other than the angelic beings to participate in readings. This is for your safety. For inviting other spirit beings to participate can lead to unwanted paranormal activity within one's home. Make it abundantly clear that you wish to be surrounded and protected by Heavens forces when conducting any reading. There is no shortcut to spiritual development. In order to progress safely and well protected, one needs patience, determination, and continuous effort. One must be really serious about putting the work and effort into their spiritual development in order to proceed down the psychic path safely..
