

CLEANING YOUR CONTAINERS

We are reducing our use of single use containers by offering a refill and reuse program. We will accept dry, clean containers to refill. Start re-using the containers you have instead of adding new ones to the trash!

How to wash glass and plastic containers:

1. Empty container and all the contents of the container, rise well.
2. Use a brush to scrub the container in hot soapy water, rinse thoroughly in clean, hot water or run through a dishwasher load.
3. Air dry on a clean surface.
4. Store in a clean and dry place until ready to refill.

How to sterilize your containers:

To sterilize glass and metal containers and lids:

1. Place your container into a pot with water. Bring to boil.
2. Boil for about 15 minutes.
3. Remove carefully from water, it's hot!
4. Air dry completely before use.

To sterilize plastic containers and lids:

1. Soak in hydrogen peroxide (3%) for about 10-15 minutes.
2. Rinse
3. Let dry completely.

(Or spray with isopropyl alcohol (90%) and leave to air dry in a clean environment.)
