## Education/Development

---

August 2012 - December 2016

B.S. Petroleum Engineering  
University of Oklahoma

May 2013 - December 2016

Production Engineering Internship  
Campbell & Associates, Inc.

## Career

---

January 2017 - Present

Production Engineer  
Campbell & Associates, Inc.

- Supervise daily operations, manage pumpers and monitor production on over 100 wells
- Capable of identifying problem wells, creating budgets, developing workover plans and executing those plans to get production back online
- Perform engineering analysis on downhole conditions and equipment to diagnose problems and optimize production
- Supervise workover rigs and coordinate related services for a variety of operations including recompletions, casing leaks and plugging & abandonment
- Skilled in evaluating and optimizing artificial lift methods such as rod lift, electric submersible pump and plunger lift
- Experienced in managing surface facilities like high volume, multi-well tank batteries and saltwater disposal facilities as well as maintaining related equipment such as separators, heaters, FWKOs, compressors and pumps
- Trained in Echometer fluid level and dynamometer analysis
- Trained in SPCC plan development
