

BIOGRAPHY

ROBERT A. CAMPBELL

EDUCATION AND PROFESSIONAL ACTIVITIES

College: Oklahoma University, BS Petroleum Engineering, 1971
Oklahoma University, MS Petroleum Engineering, 1974

Professional Activities

- Adjunct Professor – Univ. of Oklahoma – Petroleum Engineering Dept.
- Member, AIME-SPE.
- Registered Professional Engineer - Oklahoma
- Past Chairman, SPE Symbols and Metrication Committee
- Author of numerous technical papers, reference books and training manuals on Petroleum Engineering and economics.
- Co-author of reference book: Analyzing and Managing Risky Investments.
- Co-author of reference book Analysis & Management of Petroleum Investments.
- Co-author of three volume treatise titled Mineral Property Economics.

PROFESSIONAL EXPERIENCE

CAMPBELL & ASSOCIATES, INC. (March, 1979 to Present)

Mr. Robert A. Campbell is the Founder and President of **Campbell & Associates, Inc.**, an established petroleum engineering consulting firm headquartered in Norman, Oklahoma. The firm conducts reservoir management studies and reservoir evaluations for estates, banks, corporate reserve reports, prospect evaluation and expert witness testimony. The firm also operates producing oil and gas properties, provides field supervision services and various geological services for a myriad of clients.

ROBERT A. CAMPBELL, Consulting Engineer

Self-employed petroleum engineer consultant from September, 1976, to March, 1979

JOHN M. CAMPBELL & COMPANY (1971 to 1995)

Vice-President, associated consulting engineer and instructor. Authored three training manuals in the subject area of physics, chemistry and phase behavior of hydrocarbons. Was an instructor for economic and evaluation schools in the United States, Venezuela, Trinidad, Scotland, Kuwait, Thailand and Indonesia. Mr. Campbell has provided petroleum engineering consulting functions on numerous consulting projects including artificial lift studies in Abu Dhabi, expert witness activities and engineering functions for OPEC contracts.

JASPER & LOHMAN ENGINEERING, INC. (August, 1976)

Supervised the reservoir engineering and exploration staff for the firm.

ENSERCH EXPLORATION, INC. (Formerly Lone Star Producing Company) (June, 1969 to July, 1976)

His last four years with the firm was in the position of District Engineer who was responsible for supervising all engineering activities in the Mid-Continent, Rocky Mountain and Appalachian Regions. These duties included log analysis, economics, preparation of geological exhibits and economics for developmental projects and reservoir performance projections. Mr. Campbell was also responsible for evaluation and reservoir engineering functions associated with two 30,000'+ wells drilled in the Anadarko Basin. Was also responsible for record maintenance and monitoring all non-operated properties and secondary recovery units. Was also responsible for preparation of all regulatory filings and for organizing, designing, evaluating and developing a developmental drilling program and transportation system for a 900 square mile area in northeastern Ohio.
