# How to setup and use the Context Menu in MicroStation

The following image shows the customization that is in the DGNLIB file and is accessed by pressing and holding down the Right Mouse Button. This will display the Context Menu as shown in the following image.

The file that should have accompanied this PDF is named:
CT_Custom_Interface_From_Sam_Hendrick(updated_04-05-2022).dgnlib
1. Download the DGNLIB file to a location you will remember, if the browser you are using lets you choose.
Otherwise, it might be downloaded to the *Downloads* folder.

2. Using Windows Explorer, locate the DGNLIB file named.

CT_Custom_Interface_From_Sam_Hendrick(updated_04-05-2022).dgnlib
4. Copy the DGNLIB file to folder location listed below
D:\USERS_CTConnect.<your snumber>\WorkSpaces\Caltrans\Standards\dgnlib\GUI
NOTE: The following path may be different on your PC. If you are unable to locate where this folder is on your PC, please feel free to contact me. Sam.hendrick@bentley.com
