

Purpose-Built AP for Advanced Manufacturers

Built for Businesses Where Every Detail Matters

Advanced manufacturing demands flawless execution—both on the floor and in financial operations. But manual data entry, slow approvals, and limited cost visibility hurt cash flow and profitability. MakersHub streamlines AP with a flexible solution that fits your workflows—automating bill capture, approvals, and payments with control and accuracy.

Why Advanced Manufacturers Choose MakersHub

Most AP platforms are built for generic businesses. MakersHub is different—designed for advanced manufacturing environments with custom parts, specialized processes, and strict cost controls.

Tailored Bill Processing for Complex Invoices

Our AI intelligently captures and organizes data from even the most detailed vendor bills—line items, part numbers, and job codes—automatically.

Customizable Approval Workflows

Design multi-step approval flows that match your exact processes—by vendor, part type, department, or cost center—ensuring compliance and reducing delays.

Real-Time Cost Visibility & PO Matching

Track costs by part, job, or project. Automatically cross-check bills against POs and receipts to prevent overpayments and discrepancies.

Centralized Vendor Communication & Tracking

One place to manage vendor bills, payment status, and history—eliminating inbox chaos and improving accuracy.

Deep Two-Way Integration with Your Accounting System

Sync every bill, approval, and payment to your system in real-time, customized to your chart of accounts and workflows.

Smarter Accounts Payable Begins Long Before the Bill is Paid. **Schedule a Demo Today**
